

**Data Engineer**

ALDI International IT Services (Hungary) • Buda...

**The knowledge I own:**

- Degree in Computer Science or related field
- 10+ years of experience in software or infrastructure development, including at least 4 years in data engineering within distributed computing, big data, or advanced analytics environments
- Strong expertise in SQL and data analysis, with proficiency in at least one programming language such as Python or Scala
- Experience in database development and data modeling, ideally with Databricks/Spark and SQL Server; knowledge of relational, NoSQL, and cloud-based databases.
- Solid understanding of distributed computing concepts, preferably with Spark or MapReduce
- Hands-on experience with Azure tools such as Azure Data Factory, Azure Databricks, Event Hub, Synapse, and ML services
- Good understanding of data and analytics concepts, including dimensional modeling, ETL, data warehousing, reporting, data governance, and handling structured and unstructured data
- Familiarity with Unix systems, especially shell scripting
- Basic knowledge of network concepts, connectivity, and troubleshooting
- Foundational understanding of machine learning, data science, AI, statistics, or applied mathematics
- Strong communication skills and fluent English; German is a plus

**Tech Stack**

- Azure Databricks
- Azure Data Factory
- Python
- PySpark
- ServiceNow
- M365
- and other tools depending on the role

**The offer that would convince me:**

- We develop and maintain our own product with high emphasis on quality and long-term stability
- Code quality matters: we follow Clean Code and SOLID principles backed by robust testing
- Flexible working hours and remote work options
- Competitive salary with regular adjustments based on inflation and loyalty
- Access to continuous learning via our internal learning platform and expert communities

**Online application:**

Please use our online application and attach your resume.

#### What does it take to fit the bill?

- Consultant mindset & passion for customer experience - you prioritize your work with the customer in mind and you seek to advise (rather than purely execute) your customers on the best-in-class technical solutions;
- Excellent communication & presentation skills - you can adjust your communication style, and articulate complex, technical concepts to all types of audiences;
- Solid software engineering foundations - you are a stack-agnostic senior software engineer, have significant experience working on Unix/Linux, and a strong understanding of how Distributed Systems work. Additionally, you are familiar with (and keen to follow) best-in-class software engineering principles;
- Data & Cloud are part of your engineering journey - you played a role in teams that designed and implemented data-intensive applications and you have strong SQL & NoSQL hands-on experience. Exposure to Real-Time Data Processing Systems, Apache Spark, and/or the Big Data ecosystem is an advantage;
- Mentoring skills & strong predisposition to knowledge-sharing - are things that excite you. We consider ourselves a learning organization and believe that these are meaningful tools for one to compound his/her impact across the team and the organization. Thus technical mentoring and/or people management hands-on experience is a big plus;
- You thrive when having to solve problems & take ownership - you solve problems on your own and advise (or coordinate) others on how to do the same. Moreover, you love stepping up as a technical lead or identifying organizational gaps and filling them in - being an organizational process or documentation gap, a customer communication miss-match, or a resource allocation deficiency;
- You are fluent in English and willing to travel (mainly in the EU and normally within a short business trip setup) up to 15% of your time.

#### What do we offer?

- Educational benefits: There's no shortage of learning opportunities at DATAPAO, meaning that you'll get access to Databricks' public and internal courses to learn all the tricks of Distributed Data Processing, MLOps, Apache Spark, Databricks, and Cloud Migration from the best. Additionally, we'll pay for various data & cloud certifications. You'll also get dedicated time for learning during work hours and access to our internal library.
- Flexible PTO and Working Hours: We're flexible about your working routine and how many days you take off if it does not conflict with customer success, company goals, and the work you do.
- Flexible Office: It is up to you which days you spend in the office. However, as a strong community is one of DATAPAO's value propositions, we'd expect you to spend one day per week in the office on average.
- 30 Calendar Days of Paternity Leave (if applicable): We think it's essential for both parents to be there when it matters the most.
- Private Medical Insurance: We provide a private medical package via Generali.
- Employee Assistance Program (EAP): Through EAP we offer our employees access to psychological, financial, and legal consulting services via phone or in person.
- Top-notch working equipment: Working comfortably means working well. Therefore, you will get a MacBook, a Herman Miller office chair, standing desks in the office, and whatever else is needed to give your best.
- The chance to make an impact in a high-transparency culture: Open feedback and a no-politics environment are things we value a lot at DATAPAO. Additionally, you'll get the chance to shape the future of a rapidly growing tech company, to work with cutting-edge technologies, and to help some of the biggest and most innovative companies in the world sort out their data puzzles.
- A cozy and modern office in the heart of Budapest: Located in a vibrant, central part of the city (Opera/Oktogon), it's designed to foster focus, creativity, and team connection. You'll find open spaces for group work, quiet corners for deep thinking, and plenty of natural light. It's well-stocked with snacks, drinks, coffee, and beverages. Optional Friday evening beers, movie, and wine-tasting nights with the team are also on us.

The gross salary for this position ranges from **gr. 1.200.000 - 1.700.000 HUF/month for a Medior** and from **gr. 1.700.000 - 2.300.000 HUF/month for a Senior role**, depending on your assessed seniority level during the selection process.

#### Want to know more about us?

DATAPAO is a Databricks Gold Partner covering the full data and AI journey – architecture, delivery, and enablement – for global brands that refuse to settle for "good enough." We don't hand over a slide deck and walk away: our engineers embed directly with client teams, and our training arm has turned 20,000+ professionals into Databricks experts worldwide.

We're backed by Databricks itself – the creators of Apache Spark – and act as their delivery and training partner across Europe. That partnership has earned us Databricks EMEA Emerging Partner

## Requirements

- Extensive development experience (over 3 years) in end-to-end Data Analytics Solutions with classic and modern cloud data technologies
- Production experience in Data Analytics, Data Visualization, Data Security, Data Modelling, and similar areas
- Experience building data provisioning and transformation pipelines (ETL/ELT), Data Warehouse, and Database design for on-premises and cloud environments
- Experience with data modeling and understanding of Data Architecture Layers including multi-source management and data cleansing
- Advanced SQL knowledge, including analytical functions, MODEL, and PIVOT
- Understanding of advanced data security principles such as audit, RLS, VPD, and attribute-level security
- Practical experience developing Data Analytics/ Visualization Solutions in Cloud environments (AWS, Azure, GCP)
- Solid understanding of core cloud technologies and awareness of niche cloud services
- Proven experience in data solutions troubleshooting, monitoring, performance tuning, and bottleneck analysis
- Good understanding of CI/CD principles and deployment models like Canary release and Blue-Green
- Data-oriented mindset with strong compliance awareness (PI, GDPR, HIPAA)
- Ability to work effectively in a fast-paced, startup-like agile development environment
- Analytical problem-solving skills with excellent interpersonal and communication abilities
- Experience in direct client communications
- Experience across different business domains
- English proficiency at B2 level or higher

## We offer

- Dynamic, entrepreneurial corporate environment
- Diverse multicultural, multi-functional, and multilingual work environment
- Opportunities for personal and career growth in a progressive industry
- Global scope, international projects
- Widespread training and development opportunities
- Access to LinkedIn Learning solutions
- Competitive salary and various benefits
- Advanced wellbeing and CSR programs, recreation area

AI Engineer

Aliz • Budapest, Hungary (Hybrid)

Why we are looking for you

We are looking for an AI Engineer preferably with a Cloud or ML engineer background who has experience in building agentic systems and treats modern AI tools as a "third hand", not as a shortcut, but as a force multiplier for designing, building, testing, and shipping reliable solutions.

The ideal candidate is curious, hands-on, and continuously up to date with agentic tools (such as Claude Code, Codex, and similar harnesses), solutions and AI in general. They understand how to build agent harnesses, workflows, and guardrails around them, while also keeping up to date with new harness technologies. They can combine coding, low-code, and no-code approaches without sacrificing quality, using structured context, validation, automated testing, monitoring, and human-in-the-loop controls to enforce reliability. We are looking for someone who can effectively drive agents via clear and well architected specifications and decomposed tasks. This role is for someone who can translate business problems into practical AI-assisted solutions and help the wider team adopt AI responsibly and effectively.

This role will suit you if you

- you already have experience building agentic solutions/workflows in production.
- see AI tools as a serious engineering partner, not just a productivity shortcut.
- enjoy experimenting with what AI agents, coding assistants, and no-code tools can do in real business workflows.
- care about quality, testing, maintainability, and responsible AI use.
- are comfortable learning fast and staying up to date with AI tools and news.
- enjoy tackling complex challenges across different domains and have the agentic mindset and problem-solving skills to overcome them.

You will be responsible for

- setting up agentic workflows on various projects for various problems.
- using AI coding agents and no-code or low-code platforms to accelerate delivery without compromising reliability. The projects would range from building genmedia applications to automating complete data warehouse migrations.
- creating agent harnesses, prompts, workflows, evaluations, and guardrails to make AI outputs safer and more predictable.
- testing, validating, and monitoring AI-generated or AI-assisted solutions.
- helping teams understand where AI can create value and where human control, review, or traditional engineering is still needed.
- documenting best practices and reusable patterns for responsible AI adoption.

We are looking for you if you

- have overall 5+ years of professional experience in software development, with deep knowledge of common methodologies (SOLID, TDD/BDD, Clean Code, CI/CD, refactoring, design patterns, containerization, observability, security, QA).
- have at least 2 years experience working with generative AI and coding assistants, possessing practical proficiency with toolsets like Codex, Claude, Copilot or similar.
- have experience with using agentic tools and setting up agentic workflows, including long running agents, to take on a greater variety of technical challenges than before, working in domains you used to be unfamiliar with.
- hands-on experience with public cloud environments (preferably GCP).
- have experience with enterprise environments and customers.
- curiosity and a passion to learn new methodologies and technologies.
- fluent communication skills in English.

It would be nice if you also have

- experience with using machine learning tools to solve problems for business stakeholders.
- an understanding of the inner workings of LLMs, coding assistants and ML technologies.
- have some previous experience with data engineering.
- team lead or influence without authority experience.
- client-facing skills and consulting experience.

Why people stay

- strong engineering culture
- real autonomy
- international exposure
- high technical bar
- flexible working model

You will enjoy

- using cutting-edge technologies and learning from A+ Google Cloud experts.
- maintaining a healthy work-life balance with financial initiatives to support physical and mental health and green commuting.
- a hybrid and collaborative working environment, with no compulsory office days.
- flexible working time to adapt to when you feel most productive.
- employee counseling opportunity with coaches and contracted psychologists.
- continuous training and learning opportunities with yearly allocated learning hours from working time, regular feedback, and dedicated mentorship by experienced colleagues.
- last but not least, a great community. :)

## WHAT YOU'LL BRING

- 5+ years of software engineering experience (NodeJS, TypeScript, React, Python, REST, RDBMS, NOSQL) backend systems or similar stacks
- Comfort operating in a research-adjacent, evidence-driven environment
- Passion for building the scalable data pipelines that empower our ML engineering efforts.
- Agile & iterative mindset (end-to-end ownership; you build it, you run it)
- Experience with cloud data/ML infrastructure, AWS preferred
- Experience with containerization (Docker) and Kubernetes
- Understanding of data modeling across both relational and unstructured data
- Strong experience in automated testing
- Excellent problem-solving skills
- English language proficiency

SEON Technologies collects and processes personal data in accordance with applicable data protection laws. If you are a European Job Applicant see the [privacy notice](#) for further details.

SEON is an equal opportunity employer. We strive to embrace what makes each one of us unique; we each have our own story. Whether looking at our current staff or future team members, we believe that everyone has something to contribute, and our employment practices reflect that. We do not make an employment decision based upon race, color, religion, age, sex, national origin, disability status, genetics, protected veteran status, sexual orientation, gender identity or expression, or any other characteristic protected by federal, state, or local laws. Please let your recruiter know if you need reasonable adjustments to our recruitment process.

Compensation Range: HUF 18,168,682 - HUF 24,581,015

## Requirements

- 2–5 years of professional experience in data engineering, business intelligence, analytics, or cloud-based data solutions.
- Strong practical experience with Power BI and SQL, including data modeling, report and dashboard development, data transformation, and working with relational and analytical data.
- Good hands-on knowledge of Microsoft Fabric, including data engineering, data integration, Lakehouse, Warehouse, and analytics concepts, as well as a good understanding of Microsoft Azure data services.
- Experience working directly with customers or business stakeholders, with the ability to translate business requirements into practical technical solutions and communicate technical concepts clearly.
- Ability to independently manage technical tasks and workstreams within a project, with a proactive, problem-solving, and delivery-oriented approach.
- Native or near-native proficiency in Hungarian, with the ability to communicate confidently and professionally with customers in both technical and business contexts.
- Business-level proficiency in English, with the ability to participate in customer meetings, present technical solutions, and collaborate with international stakeholders.
- Experience in discovery, consulting, presales, or customer-facing technology projects is an advantage.
- Willingness to continuously develop expertise in Microsoft data and analytics technologies.

## NICE TO HAVE

- Microsoft certifications related to Power BI, Microsoft Fabric, or Azure Data.
- Experience with Azure Data Factory, Azure Synapse, or other Microsoft data services.
- Experience delivering Proof of Concepts or Proof of Value solutions.
- Familiarity with data visualization and BI best practices and experience working in Agile project environments.

Location: Budapest - NQHUN, Budapest, Budapest, Hungary

Mentés

**The knowledge I own:**

- Strong Python development skills and experience building backend services (e.g. FastAPI)
- Hands-on experience with GenAI frameworks such as LangChain, LangGraph or similar agent frameworks
- Experience designing RAG pipelines, working with embeddings and vector databases
- Understanding of prompt engineering, context management and LLM application design patterns
- Experience building production applications with modern software engineering practices
- Comfort working with JavaScript and React for building simple interfaces or integrations
- Experience building automation workflows (e.g. n8n or similar automation platforms)
- Experience working with cloud platforms such as Azure and integrating enterprise systems (e.g. SAP)
- Understanding of evaluation strategies, observability and monitoring for AI systems
- Comfortable using modern AI tools and copilots as part of your daily development workflow
- Experience with testing, code reviews and collaborative development practices
- Fluent and effective communication in English within an international team
- Growth-oriented mindset with willingness to learn new platforms and technologies
- Comfortable working in an environment that includes operational responsibility; on-call participation may be required later

**What makes a great candidate:**

- You have a strong technical background in Computer Science, Artificial Intelligence or a comparable field
- You have built and delivered at least 2–3 real AI-powered applications, features, or automations that solved practical problems
- You can independently implement GenAI solutions end-to-end, from idea to working prototype or MVP
- You have hands-on experience building at least one RAG system, AI agent, or production LLM integration
- You demonstrate ownership by taking responsibility for delivering working solutions rather than just experiments or demos
- You understand the practical challenges of working with LLMs such as hallucinations, context limits and prompt reliability
- You are curious about business problems and enjoy translating them into practical AI or automation solutions
- You actively use AI tools to improve your productivity and development workflow
- You continuously learn and explore new tools, frameworks and approaches in the rapidly evolving AI ecosystem

**For bonus points:**

- Experience with agent architectures and multi-agent systems
- Experience with production LLM deployments or AI platform engineering
- Experience with CI/CD, containerization (Docker) and modern cloud-native workflows
- Experience building internal developer tools or productivity platforms
- Experience working with enterprise knowledge bases and document processing systems

*Don't feel like you fit all of the above points? Apply anyway! You may be exactly what we are looking for!*

**The offer that would convince me:**

- In our international team you can work with colleagues from all over the world
- We develop our own internal products and focus on high-quality, stable solutions that create real business impact
- At ALDI our engineering culture emphasizes clean architecture, code quality and practical problem solving
- Flexible working hours with home office possibility
- Regular salary increases – we follow inflation and

[Jelentkezés](#)[Mentés](#)

## Must-Haves

- 3+ years of experience in data engineering or data analytics, focusing on the transformation component of the ELT process.
- Experience building scalable transformation layers, preferably through formalized SQL models (e.g., dbt).
- Experience in Python for transformations beyond SQL.
- Experience with CI/CD and code version control.
- Strong hands-on experience with relational databases (e.g., Postgres, Iceberg), including query optimization.
- Ability to adapt quickly in a fast-paced environment and tailor solutions to evolving business needs.
- Experience with ETL technologies for ingestion (e.g., Airbyte) and orchestration (e.g., Airflow).
- Experience working in a cloud environment (AWS or GCP).

If you're passionate about analytics engineering and thrive in a dynamic startup environment, we'd love to hear from you!

## How We Take Care Of You

- Competitive Salary & Stock Options
- Benefits: Health benefits start on day 1. In the US this includes Medical, Dental, Vision. In Canada, this includes supplemental health care. Internationally, this includes a stipend value to offset medical costs.
- New Hire Home-Office Setup: One-time USD \$500
- Monthly Stipend: USD \$150 per month via a Brex Card
- Work with awesome hard working people super

- Вакансії

Computer Vision Engineer

Дік Шерші (Wild Honeys) — українська hi-tech компанія, що створює технології, які щодня працюють на фронті. Наші системи використовуються підрозділами ЗСУ для протидії ворожим безпілотникам та захисту інфраструктури.

Ми шукаємо досвідченого CV Engineer.

Чому ця роль унікальна?

Результаты вашей работы.

- використовуються безпосередньо на фронті;
- впливають на результат бойових дій;
- допомагають зберігати інфраструктуру та життя людей;
- підсилюють обороноздатність України.

On His Candidate, Rick Warren.

- має 2+ роки досвіду в Computer Vision;
- має математично або інженерну освіту,
- вмієно володіти C++ та Python;
- базовий стек: Досвід PyTorch / TensorFlow / досвід роботи на Linux;
- має базові розуміння автономіїв (PX4 / ArduPilot), протоколи керування (MAVLink) та новітні імплементації рішень (Kalman Filter, BKF);
- має досвід роботи з edge AI compute (Raspberry / Jetson / Coral TPU / Intel);
- має відміти problem solving навички

БЕЖАНО МАТИ НАБЕД-ОК.

- visual Odometry / SLAM (ORB-SLAM, OpenVINS тощо) для дослідження та впровадження нових підходів;
- sensor fusion: IMU / камери / GPS та інші;
- досвід розробки CUDA kernels

Вашими заданиями будут:

- інтеграція CV/ML алгоритмів під БІЛА-контекст. Дослідницька робота, здатність знаходити та аналізувати нові технічні матеріали;
- розробка production-ready коду на C++ / Python, feature ownership;
- повний цикл роботи з моделями: збір та підготовка даних, тренування та валідація, оптимізація під айде (latency / FPS);
- оптимізація та деплой моделей на onboards-системи (TensorRT, ONNX, квантизація, прунінг);
- участь у польових тестах, швидка ітерація алгоритмів

Ми пропонуємо:

- фронтовані протягом першого тижня роботи;
- просуваю до зрівняння між власною та військовою обліку;
- конкурентну зарплату (прогналимо о-хування кандидатів);
- офіційне працевлаштування;
- критичний формат роботи (перший місяць для зв'язності в офісі);
- графік: пн-пт, 10:00-19:00;
- мотивація: робіт суботи, які сплачуються доплатою;
- зв'язки на тесті;
- медичне страхування;
- можливість на реалізовані проекти;
- можливість працювати над технологіями, які реально використовуються на фронті;
- наявність укріплень.

### Етапи відбору

- короткі телефонні інтерв'ю (Signal / WhatsApp)
- технічна співбесіда (Google Meet або офлайн)
- поліграф

Готові доєднатися до сильних? Надсилайте своє резюме на пошту: [recruites@wildhometts.com](mailto:recruites@wildhometts.com) і ми зв'яжемося з вами.

## What You Bring

- Strong proficiency in Python and SQL
- Experienced in Spark or similar distributed processing technologies
- Deep experience with AWS data services (Glue, S3, Step Functions, Athena, EMR, DynamoDB, SQS)
- Experience working with data streaming technologies (Kafka, Spark Streaming, etc.)
- Experienced in data modeling (preferably in finance or insurance)
- Familiarity with MongoDB and document-oriented data sources
- Experience with data lake patterns: medallion architecture (bronze/silver/gold), schema management, incremental processing
- Comfort with IaC (CloudFormation or Terraform)
- Ability to debug data quality issues across distributed systems
- Experience implementing data quality frameworks (e.g., Great Expectations) to ensure pipeline reliability and data integrity

## Nice to Have

- Experience in subrogation, claims processing, insurance or financial technology

## English level

## Upper-Intermediate

## Legal & Hiring Information

- Exadel is proud to be an Equal Opportunity Employer committed to inclusion across minority, gender identity, sexual orientation, disability, age, and more.
- Reasonable accommodations are available to enable individuals with disabilities to perform essential functions.
- Please note: this job description is not exhaustive. Duties and responsibilities may evolve based on business needs.
- Compensation details are shared with candidates at the early stage of the recruitment process.
- The offer is not binding until a signed contract is in place.

## Your Benefits at Exadel

Exadel benefits vary by location and contract type. Your recruiter will fill you in on the details.

- International projects
- In-office, hybrid, or remote flexibility
- Medical healthcare
- Recognition program
- Ongoing learning & reimbursement
- Well-being program
- Team events & local benefits
- Career development

[Jelentkezés](#)

[Mentés](#)

- Üzleti igények technikai specifikációjává alakítása
- Tranzakciós és analitikai adatokra épülő, összetett Power BI riportok és vizualizációk fejlesztése
- Adatmodellek tervezése és optimalizálása Power BI-ban
- Csapattagok támogatása Power BI használatában, bevált gyakorlatok megosztása
- T-SQL lekérdezések írása, adatforrások kezelése
- Magabiztos Power BI ismeret, különös tekintettel az eszköz képességeire és vizualizációs lehetőségeire
- Tapasztalat Power BI adatmodellezésben és teljesítményoptimalizálásban
- Erős T-SQL tudás
- Proaktív hozzáállás és csapattámogatási készség Power BI fókuszú kérdésekben
- Tárgyalóképes angol nyelvtudás
- Nagyvállalati BI/Riporting környezetben szerzett tapasztalat
- PowerBI riportok és hozzájuk kapcsolódó fejlesztések tesztelésében szerzett gyakorlati tapasztalat

Olyan tapasztalt BI fejlesztőt keresünk, aki mély ismeretekkel rendelkezik a Power BI eszköz használatában, és képes összetett riportok tervezésére és fejlesztésére, mind tranzakciós, mind analitikai adatok felhasználásával.

A leendő kolléga aktívan hozzájárul a csapat BI képességeinek erősítéséhez, támogatást nyújt a Power BI használatával kapcsolatos kérdésekben, és javaslatokat tesz a vizualizációk, modellezés és teljesítményoptimalizálás terén.

- Csapatunk eredményeit saját belső képzési rendszerünkkel biztosítjuk, informatikai és gyakorlati tanfolyamokkal, mentorprogrammal segítünk Téged, hogy a személyre szabott karrierutad következő állomását mihamarabb elérd.
- Biztosítjuk angol nyelvtudásod fejlesztését.
- A szakmai fejlődés mellett nagyon fontosnak tartjuk, hogy ne csak egy munkahelyet kapj tőlünk, hanem egy tudásmegosztó környezetet, ahol szakmai kérdésekben mindig támogatásra lelsz, egy közösséget, ahol a kölcsönös rugalmasság és bizalom mellett a jókedv és a kikapcsolódás is garantált.
- Vegyél részt a közös túraprogramjainkon, társasjátékestjeinken, gyere el a családi napra, síelésre, ültess fát velünk, legyél részese a TestIT társadalmi felelősségvállalásának, legyen szó akár hátrányos helyzetűek támogatásáról, akár Mikulás csomag kézbesítéséről.
- Készültünk Neked juttatási csomaggal is. A fizetéseden kívül havi rendszerességű SZÉP kártya utalást, egészségbiztosítási csomagot kínálunk.

- ✓ Demonstrated expertise in **hematological malignancies**, including **multiple myeloma, leukemia, and/or lymphoma**
- ✓ Strong knowledge and practical application of **CDISC standards**, including **SDTM**
- ✓ Experience performing or overseeing **QC of SDTM datasets and related outputs**
- ✓ Proven ability to work effectively within cross-functional teams and influence key stakeholders
- ✓ Excellent verbal and written communication skills
- ✓ Strong understanding of statistical principles and clinical trial methodology

## Preferred Qualifications

- ✓ Experience serving as **Lead Study Statistician** within a cross-functional clinical development team
- ✓ Knowledge and experience in **clinical trial statistical design** and study planning
- ✓ Experience supporting regulatory submissions and interactions with health authorities
- ✓ Familiarity with advanced statistical programming tools and industry-standard processes

IQVIA is a leading global provider of clinical research services, commercial insights and healthcare intelligence to the life sciences and healthcare industries. We create intelligent connections to accelerate the development and commercialization of innovative medical treatments to help improve patient outcomes and population health worldwide. Learn more at <https://jobs.iqvia.com>

IQVIA is committed to integrity in our hiring process and maintains a zero tolerance policy for candidate fraud. All information and credentials submitted in your application must be truthful and complete. Any false statements, misrepresentations, or material omissions during the recruitment process will result in immediate disqualification of your application, or termination of employment if discovered later, in accordance with applicable law.

Mentés

### **Required skills/technologies used**

- 4+ years of experience in BI reporting and analytics.
- Strong hands-on SQL skills.
- Hands-on experience with Power BI, including report development and working with data models.
- Strong knowledge of dimensional modelling principles and experience designing data models for reporting and data integration.
- Practical experience with dbt and SQL-based data transformation.
- Good understanding of data warehousing and ETL/ELT concepts and data integration processes.
- Strong analytical and problem-solving skills, with the ability to understand complex data structures and translate business needs into effective data solutions.
- Ability to work collaboratively with technical and business stakeholders in a dynamic environment.

### **Advantages**

- Experience with cloud-based data platforms and modern data analytics environments.
- Experience working with large-scale or complex data environments.

### **Why should you join us?**

- Because we can count on each other, we form a professional and human community.
- Opportunity to participate in professional trainings, conferences.
- With your success and professional knowledge, you can build your career continuously.
- Stable company, market leading customers.
- You can participate in exciting team buildings and events.

 **Egyszerű  
jelentkezés**

**Mentés**

### What makes you thrive here:

- 7-10 years in data and AI, ideally a mix of consulting and client-side work
- A background that spans data engineering and data science which makes you credible in front of clients
- Real delivery experience: you've built and shipped data and ML solutions, rather than designed them on paper, but never taken to production.
- A track record of closing complex enterprise data deals, or being the technical voice that made the close happen
- You've owned or co-owned a revenue target and understand how pipeline development and account growth actually work
- Comfortable running workshops, advising senior clients, and building the kind of trust that turns a single project into a long-term account
- Fluent English is a must; Hungarian is not required, and we're open to candidates across European markets
- Finance, insurance, or energy experience is a strong plus

### Why join Supercharge?

- To unleash your full potential, we're here to help you grow every step of the way with exciting international projects, access to inspiring conferences, in-house soft skill trainings, and online courses. We'll even support your English classes, and with our skill matrix, you'll always have a clear path to learn.
- To feel your best, your wellbeing truly matters to us. That's why we offer health coverage with Medicare, Life1 gym access to keep you moving, and extra sick days for those moments you just

[Mentés](#)

### **We are excited if you have (Required Experience):**

- 5+ years of experience as a Data Engineer.
- Proven experience with AI-first approaches and "Vibe Coding," with a demonstrated ability to deliver production-ready data pipelines using AI orchestration rather than purely manual coding.
- Deep proficiency with AI-assisted coding tools, including Cursor, GitHub Copilot, or Gemini, to modernize and accelerate engineering workflows.
- Solid skills in System Design for diverse data architectures, including expert-level knowledge of batch processing and real-time/streaming processing.
- Proficient in coding with Python (primary) and SQL, with experience in ETL and data processing.
- Hands-on experience with Distributed Systems and Big Data technologies, including Spark and the Hadoop ecosystem (Hive, Impala, Kafka).
- Proven proficiency in Data Modeling using industry best practices (e.g., Kimball, Inmon) to ensure data integrity.
- Ability to monitor critical data pipelines for quality and resolve any issues effectively.
- Education: Bachelor's degree in Computer Science, Engineering, Information Systems, or a related field or equivalent experience.
- Strong communication skills, both written and verbal.

### **You may also have:**

- Experience supporting GenAI applications from the Data Engineering side, including managing vector databases, RAG (Retrieval-Augmented Generation) pipelines, or LLM data orchestration.
- Experience with Apache Airflow or Apache NiFi.
- Expertise in optimizing data storage using HDFS/Parquet/Avro, Kudu, or HBase.

### **What you can expect from us:**

- Generous PTO Policy
- Support work life balance with [Unplugged Days](#)
- Flexible WFH Policy
- Mental & Physical Wellness programs
- Phone and Internet Reimbursement program
- Access to Continued Career Development

**The knowledge I own:**

- Strong Python development skills and experience building backend services (e.g. FastAPI)
- Hands-on experience with GenAI frameworks such as LangChain, LangGraph or similar agent frameworks
- Experience designing RAG pipelines, working with embeddings and vector databases
- Understanding of prompt engineering, context management and LLM application design patterns
- Experience building production applications with modern software engineering practices
- Comfort working with JavaScript and React for building simple interfaces or integrations
- Experience building automation workflows (e.g. n8n or similar automation platforms)
- Experience working with cloud platforms such as Azure and integrating enterprise systems (e.g. SAP)
- Understanding of evaluation strategies, observability and monitoring for AI systems
- Comfortable using modern AI tools and copilots as part of your daily development workflow
- Experience with testing, code reviews and collaborative development practices
- Fluent and effective communication in English within an international team
- Growth-oriented mindset with willingness to learn new platforms and technologies
- Comfortable working in an environment that includes operational responsibility; on-call participation may be required later

**What makes a great candidate:**

- You have a strong technical background in Computer Science, Artificial Intelligence or a comparable field
- You have built and delivered at least 2–3 real AI-powered applications, features, or automations that solved practical problems
- You can independently implement GenAI solutions end-to-end, from idea to working prototype or MVP
- You have hands-on experience building at least one RAG system, AI agent, or production LLM integration
- You demonstrate ownership by taking responsibility for delivering working solutions rather than just experiments or demos
- You understand the practical challenges of working with LLMs such as hallucinations, context limits and prompt reliability
- You are curious about business problems and enjoy translating them into practical AI or automation solutions
- You actively use AI tools to improve your productivity and development workflow
- You continuously learn and explore new tools, frameworks and approaches in the rapidly evolving AI ecosystem

**For bonus points:**

- Experience with agent architectures and multi-agent systems
- Experience with production LLM deployments or AI platform engineering
- Experience with CI/CD, containerization (Docker) and modern cloud-native workflows
- Experience building internal developer tools or productivity platforms
- Experience working with enterprise knowledge bases and document processing systems

*Don't feel like you fit all of the above points? Apply anyway! You may be exactly what we are looking for!*

**The offer that would convince me:**

- In our international team you can work with colleagues from all over the world
- We develop our own internal products and focus on high-quality, stable solutions that create real business impact
- At ALDI our engineering culture emphasizes clean architecture, code quality and practical problem solving
- Flexible working hours with home office possibility
- Regular salary increases — we follow inflation and reward loyalty

## Your profile

- University degree in Computer Science, Business Informatics, or a comparable qualification
- Several years of experience in designing and implementing complex data & AI ecosystem architectures in enterprise environments
- Strong technical understanding of modern data platforms and data processing approaches (e.g., data engineering, data warehousing, data lakes/lakehouse, data integration, and analytics enablement) and their productive use
- Proven expertise in cloud technologies (preferably Azure), containerization (e.g., Docker, Kubernetes), CI/CD, and DataOps practices
- Experience in leading technical teams and managing stakeholders across multiple organizational levels
- Excellent communication skills, strong strategic thinking, and a pragmatic, solution-oriented hands-on mindset
- Professional proficiency in English (written and spoken), German is a plus

## Your benefits

- A modern office in the 11th district is waiting for you to support your creativity with fun community places, cafe rooms, an own cinema and a skybar
- We support you with flexible working hours and home office opportunity
- Competitive salary and wide range of other benefits (cafeteria & bonus) are provided to you
- You can be part of a successful and growing company in the field of technology
- You can learn new languages in small groups, selecting from 5 languages
- We organize leisure time activities (board games, sport activities)

## Company

thyssenkrupp is an international industrial and technology group with around 98,000 employees. In the fiscal year 2023/2024, the company generated sales of €35 billion in 47 countries. Its business activities are bundled in five segments: Automotive Technology, Decarbon Technologies, Materials Services, Steel Europe and Marine Systems. With extensive technology know-how, the businesses develop innovative solutions for the challenges of the future, especially in the fields of climate protection, the energy transition, digital transformation in the industry and mobility of the future.

In the Hungarian development center with our engineering team of 1000 we are present as an innovative and significant partner in one of the

### What You'll Bring

A successful candidate will possess:

- A minimum of 7 years of writing production-quality code in Python on Linux platform
- Candidate must be willing to learn C++. Experience in C++ is a strong plus
- Candidate must have strong interest and motivation to work with machine learning, deep learning, backtesting platform design and development technologies. Prior experience is not required but will be considered as a strong plus.
- Strong understanding and experience with Linux system programming fundamentals
- Ability to develop large-scale, distributed systems
- Strong understanding of data structures, algorithms, high-performance application design, and concurrency patterns.
- Self-motivated and able to work independently with minimal direction
- Proficiency in English

**An outstanding candidate will also have experience with one or more of:**

- Developing systems for managing and performing computation on large-scale graph data
- Streaming / dataflow systems
- Candidates need not have prior experience in financial services.

### What We Offer

- Competitive compensation package
- Core benefits include: premium private health insurance and life insurance with savings plan
- Support for every aspect of life through Employee Assistance Program and fully covered sick leave
- Strong culture of learning and development: training courses, library, guest speakers, share and learn events, global conferences
- Regular offsite team buildings, annual conferences and occasional global summits – opportunity to travel and connect with our local and global teams

By submitting this application, you acknowledge and consent to terms of the [WorldQuant Privacy Policy](#). The privacy policy offers an explanation of how and why your data will be collected, how it will be used and disclosed, how it will be retained and secured, and what legal rights are associated with that data (including the rights of access, correction,

## You are looking for us, if you have

- Have a proven track record of building data sets and data pipelines for analytical use cases
- Are proficient in Python, PySpark, and SQL; experience with additional programming languages such as JavaScript, Scala, Java, and shell scripting (Bash, Ksh, Sh) is an advantage
- Have expert-level experience in building and optimizing data lakes, distributed data processing solutions, and data pipelines, particularly using Apache Spark
- Have hands-on experience with the Azure data ecosystem, including Databricks and Azure Data Factory
- Possess strong knowledge of common data formats, including JSON, XML, Parquet, and CSV
- Have excellent analytical skills and architectural expertise to select the most appropriate technology for each use case
- Have a strong understanding of non-functional requirements, including performance, data quality, and security
- Have experience working with relational databases and advanced SQL skills
- Have experience with deployment automation, testing, CI/CD practices, and the setup of monitoring, alerting, and logging for data platforms and services
- Are fluent in spoken and written English

## You will be successful if you

- Have hands-on experience with the technology stack described above
- Possess strong analytical skills and are able to work with unstructured or incomplete data and information
- Enjoy taking ownership and working on projects with a high level of responsibility
- Have a solution-oriented mindset
- Can work autonomously and proactively close information gaps in collaboration with project teams and business stakeholders
- Are open-minded, proactive, and able to work independently in a dynamic environment

## What we are proud to provide you with

- Hybrid working with even only weekly 2 office days and flexible working hours based on core time.
- Financial benefits such as; an outstanding amount of cafeteria, referral reward and team or individual reward based on your accomplishments.
- Corporate health insurance package at one of the largest private healthcare providers with nationwide coverage.
- Carefully designed career paths, with the appropriate training courses and projects to accomplish your aims such as language courses, tech talks and trainings for your needs.
- Lufthansa Group flight ticket discounts.
- What's more, if you are interested in our additional benefits: check out our [benefits](#) page.

Our community is characterized by mutual respect and a spirit of helpfulness. This high level of professionalism, combined with diverse personalities, will help you go through your daily life in a good mood while making the most of your

#### What you bring:

- **2+ years as a GenAI Engineer**; ideally **some NLP background for RAG** and Talk2Document work.
- **Python-first engineer** who can build production APIs/services (FastAPI or similar).
- You've **built agentic systems** with LangGraph / LangChain / PydanticAI / CrewAI (or similar).
- You're **comfortable integrating tools/data** safely (timeouts, retries, idempotency, rate limiting).
- You've worked with RAG/vector search (Azure AI Search, Pinecone, Redis Vector, Milvus/Chroma).
- You've shipped Talk2Data and/or Talk2Document-style solutions (or very similar patterns).
- **You care about quality**: eval harnesses + regression suites, and you can use LangSmith/ Langfuse/Datadog to debug what's happening.
- Familiar with MCP and secure model-to-tool/data connectivity.
- **Bonus**: A2A patterns / **agent-to-agent coordination**.
- **Bonus**: agent builder frameworks (Azure AI Foundry, AWS Bedrock Agents, Vertex AI Agent Builder, or similar).
- **Cloud experience**: **Azure preferred, AWS/GCP fine**.
- EU work permit

#### Your future role

#### What you will build:

- **Agent workflows** with **LangGraph / LangChain / PydanticAI / CrewAI** (routing, retries, fallbacks, timeouts, human-in-the-loop).
- **Tool calling that doesn't break**: APIs, databases, and internal services with clean contracts, predictable behavior, and safe error handling (retries/timeouts, idempotency, rate limiting).
- **Hybrid systems**: pre-built agents plus a thin custom orchestration layer (interfaces, policies, guardrails, reuse).
- **MCP integrations**: implement MCP servers/clients so **models can safely access tools/data** (DBs/APIs/files) using least-privilege patterns and audit-friendly logging.
- **RAG + knowledge systems**: chunking, embeddings, indexing, retrieval strategies, grounding patterns; vector stacks like Azure AI Search, Pinecone, Redis Vector, Milvus/Chroma; doc ingestion with Azure Document Intelligence.
- **Real use cases**:
- **Talk2Data** (safe querying + interpretation of enterprise data)
- **Talk2Document** (Q&A/summarize/extract/reason over docs with citations/grounding)
- **Evaluation + observability**: automated evals (task success, groundedness/relevance, safety, latency, cost), regression suites, and run tracing for debugging using LangSmith / Langfuse / Datadog.
- **Cloud GenAI**: Azure OpenAI / Azure AI Foundry + Azure AI Search / Document Intelligence / Content Safety. AWS/GCP equivalents welcome (Bedrock/Vertex AI + search/document pipelines).

#### What we offer

- **A global network + a strong regional AI&D community** (~160 people).
- A dedicated technical **team that's actively growing and open to experimenting with new tech** (when it actually helps).
- **Consultancy work**, but on **real problems with real impact** - solutions people use.
- Specialize in specific areas where we are committed to support the learning process and obtaining internationally recognized certificates
- **Hybrid way of work**
- International environment where personal development and growth are supported and highly encouraged
- Unique opportunity for **a career and promotions**

Mentés

## What You'll Bring To The Role

- Bachelor's or Master's degree in a quantitative discipline such as Mathematics, Statistics, Financial Engineering, Quantitative Finance, Computer Science, Economics, or Physics.
- Knowledge of model risk management principles, quantitative modeling methodologies, and regulatory expectations.
- Strong analytical and quantitative skills, including experience with Python, SQL, R, SAS, or similar analytical tools.
- Ability to evaluate risks, assess controls, analyze data, and support audit execution activities.
- Excellent communication and stakeholder management skills with the ability to explain technical concepts to non-technical audiences.
- Relevant certifications such as CIA, FRM, CFA, CRMA, or CISA would be advantageous.
- At least 2-4 years' relevant experience in model risk management, quantitative analytics, model validation, internal audit, risk management, or a related field would generally be expected to find the skills required for this role.

## What You Can Expect From Morgan Stanley

At Morgan Stanley, we raise, manage and allocate capital for our clients – helping them reach their goals. We do it in a way that's differentiated – and we've done that for 90 years. Our values - putting clients first, doing the right thing, leading with exceptional ideas, committing to diversity and inclusion, and giving back - aren't just beliefs, they guide the decisions we make every day to do what's best for our clients, communities and more than 80,000 employees in 1,200 offices across 42 countries. At Morgan Stanley, you'll find an opportunity to work alongside the best and the brightest, in an environment where you are supported and empowered. Our teams are relentless collaborators and creative thinkers, fueled by their diverse backgrounds and experiences. We are proud to support our employees and their families at every point along their work-life journey, offering some of the most attractive and comprehensive employee benefits and perks in the industry. There's also ample opportunity to move about the business for those who show passion and grit in their work.

## Which Skills Are Required

- 5+ years of professional software engineering experience in Python, C++ or Java
- 3+ years of professional experience in Python as a primary language (non-scripting)
- Extensive experience in Pandas or NumPy, Polars is nice to have
- 1-3 years of professional experience with Linux operating systems
- Thorough understanding of databases and SQL
- Experience with large Python codebases
- Bachelor's or master's degree in Computer Science, or a related area
- High attention to detail

## Good To Have

- Experience with data engineering or ETL pipelines
- Knowledge of finance
- Knowledge of C++ or Java
- Masters/PhD

## To be successful in this position, you will have the following:

- Self-motivated and able to handle tasks with minimal supervision.
- Superb analytical and problem-solving skills.
- Excellent collaboration and communication (Verbal and written) skills.
- Outstanding organizational and time management skills.

## Company Benefits & Perks

- Discretionary annual bonus (cash and stock)
- Private healthcare insurance
- Subsidized recreational pass (AYCM VI package -

### What You'll Bring

- 5+ years of experience in AI, ML, NLP or a related field.
- Strong understanding of LLMs and conversational AI.
- Experience with prompt engineering, prompt evaluation and LLM optimisation.
- Experience evaluating conversational AI systems using qualitative and quantitative methods.
- Strong Python and SQL skills.
- Strong analytical and problem-solving skills.
- Excellent communication and stakeholder management skills.
- Proactive mindset with strong ownership and accountability.
- Experience with speech and voice AI technologies.
- Experience with AI evaluation frameworks and benchmarking.
- Experience with vector databases and embedding models.
- Knowledge of AI governance, safety and responsible AI practices.
- Experience working with production AI systems at scale.

### What's In It For You

- Remote first company in pursuit of sustainability
- A competitive salary + individual performance based bonuses every quarter
- 28 days paid annual leave
- Our core working hours are 10am-3pm in your local time zone with flexibility outside of this
- Referral bonuses & flash bonuses
- Top of the line equipment
- Annual company retreats to provide great internal networking opportunities

### Interview Process

- Remote video screening with our Talent Acquisition Team
- Online home assignment
- Remote video interview with Team Members (60 Mins)
- Final discussion with the hiring manager (60 mins)

If you're interested, we encourage you to apply!  
Every application is reviewed by a member of our

#### Required Skills

- ✓ Strong Data Engineering experience
- ✓ Databricks and PySpark expertise
- ✓ Advanced Python skills
- ✓ ETL / ELT design and implementation
- ✓ Azure Data Platform experience
- ✓ Data quality, governance and observability knowledge
- ✓ Experience building production-grade data pipelines
- ✓ Exposure to Machine Learning and AI workloads

#### Nice to Have

- ★ Azure AI Services
- ★ MLflow
- ★ MLOps and CI/CD implementation
- ★ NLP / NLU project experience
- ★ Experience in enterprise-scale AI or data platforms

#### Tech Stack

- Azure
- Databricks
- PySpark
- Python
- Azure Blob Storage
- Azure AI Services
- MLflow
- CI/CD
- MLOps
- ETL/ELT
- Data Quality & Governance

#### Working Model

- Fully remote day-to-day
- Occasional team workshops and planning sessions in Prague (typically once per quarter)
- All business travel and accommodation expenses covered
- Flexible working environment
- International engineering and AI team

📧 Interested? Send me a message or apply directly to discuss the project, team structure and rate details.

#### Az álláshirdető által megadott követelmények

- 5+ év munkatapasztalat: Databricks Products

 **Egyszerű jelentkezés**

**Mentés**

**Elvárások:**

- Felsőfokú informatikai végzettséget (kiváltható releváns szakmai tapasztalattal)
- Társalgási szintű angol nyelvtudást
- Elméleti és gyakorlati adatbázis tervezési ismereteket
- 3+ éves SQL tapasztalatot
- Python scripting tapasztalatot
- Microsoft Azure (Fabric) környezet ismeretét
- Service orientált, ügyfélközpontú gondolkodást
- Jó kommunikációs - és kapcsolatteremtő készséget
- Kitartó, precíz munkavégzést
- Informatikai újdonságok nyomon követését, folyamatos fejlődési igényt

**Előny:**

- Dbt (Dbt labs) ismerete
- Microsoft Power BI / Power Apps ismeret
- Copilot / AI ismeretek

**Amit kínálunk:**

- Egy összetartó és emberközpontú csapat része lehetsz, ahol a fejlesztési ötletek valóban teret kapnak
- Alapos betanítást és folyamatos támogatást - Ha elakadsz valamiben, együtt lépünk tovább.
- A gondoskodásunkat - baba születése, hosszabb betegség, krízishelyzetek stb
- Sokszínű feladatkört - Munkád során rálátsz a teljes szervezet életére, a társosztályokkal együttműködsz, ötletelsz, egyeztetesz, megvalósítasz, és munkáddal valódi értéket teremtesz a szervezet számára
- Rugalmasságot - A betanulásod után heti 3 nap home office lehetőséged lesz
- Laptopot és céges telefont korlátlan magánhasználatra is
- Munkába járási támogatást vagy Budapestről céges busz használatát

**Egyszerű  
jelentkezés****Mentés**
