

amire szükséged lesz a sikerhez:

- Felsőfokú gazdasági vagy informatikai végzettség
- AI eszközök intenzív felhasználói ismerete
- szenvedélyesen érdekel az üzleti folyamatok optimalizálása és hatékonyságuk növelése
- nyitott vagy a folyamatosan változó AI technológiák megismerésére és evangelizációjára
- 1-2 éves üzleti elemzés, folyamatmenedzsment vagy tanácsadói tapasztalat
- Kezdeményezőkézség, nyitottság a folyamatos tanulásra
- Önállóan dolgozol, de csapatban is jól érzed magad
- Középfokú angol nyelvtudás

előny:

- Ismered a különböző folyamatoptimalizálási módszereket (pl. Lean, Six Sigma)
- Nyitott vagy az új technológiákra és szereted tesztelni ezeket
- Magabiztosan használod az üzleti elemző eszközöket (pl. Power BI, Visio, BPMN modellező eszközök).
- Folyamat automatizációs megoldásokkal (AI/ Power Automate /UI Path) kapcsolatos gyakorlati tapasztalatod van
- legalább 1-2 évet dolgoztál nagyvállalati környezetben

munkavégzés helye:

- Központi irodánk a Lechner Ödön fasor 9. alatt található, a IX. kerületben.
- Tömegközlekedéssel könnyen megközelíthető a 2-es, 24-es villamossal, 23-as, 54-es, 55-ös busszal és a H7-es HÉV-vel is.
- Kellemes Duna-parti környezetben dolgozunk, környezettudatos, fenntartható, LEED arany minősítéssel rendelkező irodaházban töltjük mindennapjainkat.

What You Bring

- 5–8 years experience leading digital, data, or AI-driven transformation initiatives
- Proven track record delivering AI or advanced analytics use cases into production
- Strong understanding of AI concepts (e.g., ML models, data pipelines, model lifecycle)
- Ability to assess feasibility of AI use cases (data readiness, complexity, business fit)
- Experience working with data scientists, ML engineers, and IT delivery teams
- Solid program/project management skills across complex, cross-functional environments
- Strong stakeholder management, translating technical concepts into business decisions
- Familiarity with AI governance, data privacy, and responsible AI practices
- Experience scaling AI solutions beyond pilots into enterprise-wide adoption
- Exposure to industrial or engineering-driven environments (e.g., energy, manufacturing)
- Understanding of MLOps, deployment pipelines, or integration into enterprise system

Location: Budapest, District XV.

About The Team

You will join the **Grid Technology Digitalisation and Process Transformation Team**, a forward-thinking group dedicated to driving digital innovation and optimizing processes across Grid Technologies. Our team operates at the intersection of technology, business strategy, and transformation, collaborating closely with engineering, IT, and global operations to deliver impactful solutions. We foster an inclusive and agile culture where cross-functional collaboration and knowledge sharing are key to success. Together, we aim to accelerate digitalization, leverage AI, and enable a smarter, more sustainable energy grid. You'll work with passionate experts committed to shaping the future of energy through innovation and

We are looking for you if you

- are a data architect with at least 6 years of hands-on coding experience (Java/Python and SQL).
- are comfortable working with modern public cloud data platforms (GCP, AWS, or Azure) across data warehousing, pipeline orchestration, streaming/batch processing, and BI/transformation tools (e.g., BigQuery/Redshift/Snowflake, Airflow, dbt, Looker/Tableau).
- have great communication skills in English and German (mandatory for client-facing tasks).
- have experience working at an IT service or consultancy company, or have other external client-facing experience.
- have hands-on, up-to-date knowledge in using agentic AI tools to build software solutions.
- want to use your technical leadership skills to guide both our engineers and our clients' engineers on their cloud journey.
- thrive in a collaborative environment, where you can take on a lead role to guide the data team in agile practices.
- are okay with onsite presence with the customer in Germany (approx. 3 days/month).

Your diverse role will include

- leading workshops with business users to understand the core requirements, what reports they need and why, and what the customers use the data for.
- define the data platform roadmap with the client and collaborate with the team to build a backlog.
- demonstrate the built solutions to the clients.
- architecting and creating data pipelines, data platforms, and data warehouses on GCP.
- being a trusted technical consultant and trainer for

- ☒ Hybrid
- ☒ Teljes munkaidős

Készségek

- ☒ Python (Programming Language)
- ☐ SQL
- ☐ Data Engineering
- ☐ Google Cloud Platform (GCP)
- ☐ Google BigQuery
- ☐ Data Build Tool (DBT)
- ☐ Extract, Transform, Load (ETL)
- ☐ Data Warehousing
- ☐ German

Required Skills & Experience

☑ 8+ years of experience in Data Engineering, Data Architecture, or Cloud Data Solutions.

☑ Strong expertise in Google Cloud technologies, including:

o BigQuery

o Dataflow

o Dataproc

Classification: Internal

o Cloud Composer

o Pub/Sub

o Cloud Storage

o Looker

o Vertex AI (preferred)

☑ Strong understanding of:

o Modern Data Warehousing

o Lakehouse Architectures

o Data Migration & Modernization

o Real-time and Batch Data Processing

o Data Governance and Security

☑ Proven track record supporting large deals, RFP responses, and technical solutioning.

☑ Strong communication and stakeholder management skills.

☑ Ability to operate independently and drive initiatives with minimal supervision.

What We Are Looking For

We value:

☑ Strong ownership and accountability.

☑ A proactive, "get things done" attitude.

☑ Flexibility to collaborate across global time zones when required.

☑ Client-first mindset.

☑ Ability to work under pressure and manage multiple priorities.

☑ Strong leadership presence and decision-making capability.

Preferred Qualifications

☑ Google Professional Data Engineer Certification.

☑ Google Professional Cloud Architect Certification.

☑ Experience with AI/ML, GenAI, or Analytics solutions on GCP.

☑ Experience in consulting, managed services, or large-scale enterprise transformations.

If you are an ambitious Google Cloud Data Architect who enjoys winning deals, shaping solutions, and taking end-to-end ownership, we'd love to hear from you.

Google Cloud Platform (GCP)

What We're Looking For

- MSc or PhD in Computer Science, Machine Learning, NLP, Quantitative Finance, or related field.
- 3+ years experience in quantitative investment strategies from buy-side or sell-side, with proven success in ML/NLP-driven initiatives.
- Hands-on experience with LLMs, LRMs, and coding assistant technologies.
- Background in alpha generation, time-series modeling, workflow orchestration, and multi-agent LLM architectures.
- Proficiency in Python (plus SQL or other databases). Entrepreneurial mindset with strong business acumen and a passion for pushing the boundaries of applied AI in finance.

Why Join Us?

At RavenPack, you'll work at the intersection of AI and quantitative finance, shaping the future of investment decision-making in global markets.

We offer: A collaborative, international culture based in Marbella, Spain. Access to leading industry players and cutting-edge technology.

Data Engineering Manager

Enloyd Hungary • Budapest, Hungary (Hybrid)

Required technical background

- 4+ years in a team lead, principal engineer, or engineering manager role, leading local and/or remote teams.
- 5+ years of hands-on experience as a data engineer working with modern data stacks.
- Strong background in building, operating, and scaling data pipelines, including ingestion, transformation, quality, and delivery.
- Experience working in data-driven organizations where analytics and ML/AI are core to business outcomes.
- Practical experience with cloud-based data platforms and lakehouse architectures, including cost awareness and optimisation (FinOps mindset).
- Working knowledge of data science workflows, ML/AI operations, and model deployment pipelines

What we offer

- Competitive salary with annual bonus.
- Cafeteria package.
- Private health insurance.

- ☒ Teljes munkaidős

Készségek

- ☒ Data Engineering
- ☒ Data Infrastructure
- ☒ MLOps
- ☒ Decision-Making

What does it take to fit the bill?

Consulting and Technical Skills

- Consultant mindset & passion for customer experience - you prioritize your work with the customer in mind, and you seek to advise (rather than purely execute) your customers on the best-in-class technical solutions;
- Solid software engineering foundations - you are a stack-agnostic software engineer with a strong understanding of how distributed systems work. Additionally, you are familiar with (and keen to follow) best-in-class software engineering principles;
- Data & Cloud are part of your engineering journey - you have played a role in teams that designed and implemented data-intensive applications and have strong SQL and NoSQL hands-on experience. Exposure to real-time data processing systems, Apache Spark, and/or the big data ecosystem is an advantage;
- You thrive when having to solve problems and take ownership - you solve problems on your own and advise others on how to do the same. Moreover, you have a natural predisposition to identify and fill organizational gaps, be it processes or documentation gaps, customer communication mismatches, or resource allocation deficiencies.

Leadership skills

- Motivated to lead and grow people - whether you're already experienced in managing teams, or you've grown into leadership through informal experience such as leading a project team or owning delivery for a group of people, you're ready

**Automation Business Analyst**

Morgan Stanley • Budapest, Budapest, Hungary ...

**What You'll Bring To The Role**

- Beginner to intermediate experience with automation tools (VBA, Alteryx, Power Automate, Python).
- Strong Excel skills; exposure to Power BI or BI tools preferred.
- Basic understanding of Finance processes and data structures.
- Strong attention to detail and documentation skills.
- Bachelor's degree in Finance, Business, Data, IT, or related field.
- Early-career experience or internships in Finance, analytics, or automation.
- Demonstrated interest in digital finance and process automation.

#BPACC

What You Can Expect From Morgan Stanley

At Morgan Stanley, we raise, manage and allocate capital for our clients – helping them reach their goals. We do it in a way that's differentiated – and we've done that for 90 years. Our values - putting clients first doing the right thing leading with

[Jelentkezés](#)[Mentés](#)

Preferred Qualifications

- Production AI/ML systems experience where data engineering directly enabled product features
- Experience managing teams across multiple time zones or geographic locations
- Familiarity with data governance, compliance, and metadata management at scale
- Track record of building and scaling data platforms that support analytics and operational intelligence

What We Value

- Technical depth combined with leadership ability—you build systems and develop people
- Proven problem-solving and architecture design skills in complex, data-heavy environments
- Pragmatism over perfection; ability to balance technical excellence with business timelines
- Collaboration across teams and comfort partnering with analytics, data science, and engineering organizations
- Stakeholder fluency with SRE, DBA (SI: work with them also), BI/Analytics, Data Science and Product teams
- AI-leveraged delivery comfortable with the team using Claude Code, Cursor, or Databricks Genie to accelerate pipeline development

Benefits

- A unique professional challenge to taking part in building up a completely new R&D strategic hub from the ground up for a stable, market-leading enterprise.
- Manager-level benefits including an annual target bonus.
- Additional perks: a cafeteria allowance, private health insurance package
- Flexibility: Hybrid working model requiring 3 days

Jelentkezés 

Mentés

Requirements

- 4+ years in a team lead, principal engineer, or management role leading engineers (local and/or remote teams)
- 5+ years as a hands-on data engineer with recent, demonstrated experience in modern tech stacks
- Direct experience in change management, scaling teams, remote / hybrid / onsite team coordination
- Significant production experience with the Databricks Lakehouse on AWS – Unity Catalog, Delta Live Tables, Databricks SQL, and Databricks Workflows. Working knowledge of supporting AWS services (S3, IAM).
- Deep expertise in data pipeline design, ingestion, transformation, quality assurance, and delivery
- Professional experience in data-driven organizations with insights and ML/AI as core business functions
- Hands-on FinOps – owning compute spend, building cost visibility, and driving cost optimization initiatives
- Working knowledge of data science, ML/AI operations, and model deployment pipelines

Required Qualifications (What You Will Bring)

- Education: Bachelor's degree in Supply Chain, Business Administration, Engineering, Information Systems, Data Analytics, or a related field.
- Relevant experience in Supply Chain, data management, digital transformation, business analytics, or process improvement.
- Strong knowledge of Power BI and/or Tableau for dashboard development and data visualization.
- Experience working with ERP systems and business process data.
- Familiarity with workflow tools, automation solutions, and digital process improvement methodologies.
- Understanding of AI and digital technologies applicable to business process optimization.
- Experience gathering business requirements and translating them into functional solutions.
- Ability to work in a global and cross-functional environment, interacting with multiple regions and stakeholders.
- Strong project coordination, implementation, and problem-solving skills.
- Good communication skills, including the ability to train users and explain technical solutions to non-technical audiences.
- Professional proficiency in English.

Desired Characteristics (What You Will Make You Stand Out)

- Strong customer and business-oriented mindset.
- Ability to balance strategic thinking with hands-on execution.
- Proactive and Strong collaboration and stakeholder management skills.
- Comfortable working in a dynamic, multicultural, and global environment.
- Continuous improvement mindset with focus on simplification and efficiency.
- Analytical thinking with attention to detail and data accuracy.
- Adaptability to new technologies, tools, and changing business needs.
- Ability to influence adoption and drive engagement across teams.
- Sense of ownership and accountability.

Benefits Available To You

GE Vernova employees rise to the challenge of building a world that works. In order to meet this mission, we provide varied, competitive benefits to help support our workforce:

- Our compensation & benefits are designed to help you manage your personal and family needs, while rewarding high performers. We offer a robust benefits package depending on your employment status and your national requirements.
- A healthy, balanced lifestyle can mean different

Amit kérünk tőled

- 3+ év Data Engineering tapasztalat és aktív SQL tudás.
- Azure Data Factory tapasztalat
- MS Azure tapasztalat.
- Python, C# vagy Scala alapok.
- Fejlesztési módszertanok ismerete, forráskódkezelés, verziókezelés, tapasztalat nagyvállalati CI/CD és Data pipeline-ok, illetve orchestration eszközök használatában.
- Érdeklődés a legújabb technológiák iránt, nyitottság a folyamatos tanulásra, fejlődésre és tudásmegosztásra.
- Kommunikációs szintű angol nyelvtudás.
- Felsőfokú szakirányú végzettség (lehetőleg informatika, gazdaságinformatika vagy matematika).

Amit nyújtunk

- Alapbéren felüli juttatások: egészségbiztosítás + szakmai vizsgák anyagi támogatása + korlátlan konditeremhasználat.
- Stabil vállalati háttér biztos ügyfélkörrel a versenyszférában.
