

Technical competencies

- **Develop and fine-tune AI models**, including **LLMs**, **Agentic AI**, and **Generative AI** systems.
- Participate in **building and deploying robust AI applications** and services on cloud platforms (preferably Microsoft Azure).
- Design and implement efficient **AI pipelines** – from **data preparation** through to **model deployment and monitoring**.
- Strong understanding of how **AI services** communicate with **broader ecosystems**, including APIs, microservices, and cloud infrastructures.
- Familiarity with **natural language processing** (NLP) tools and techniques, with the ability to assess and apply relevant solutions for different use cases.
- **University/college degree** (preferred in Computer Science or Engineering, with AI specialization).
- Strong hands-on experience with **Python and AI/ML frameworks**.
- Experience with **version control tools** (Azure DevOps/Git).
- Strong command of **English** language (both verbal and written) and **native Hungarian**.

Non-technical competencies

- Team player attitude.
- Motivated, proactive, enthusiastic, self-driven personality.
- Willingness to learn new technologies.
- Support and guide junior developers.
- Able to explain complex AI concepts clearly to both technical and non-technical stakeholders.
- Strong analytical and problem-solving skills.
- Work effectively with cross-functional teams.
- Translate abstract problems into clear AI solution designs.
- Professional attitude and appearance.

Advantages

- Experience optimizing model inference, managing resources efficiently, and designing scalable architecture.
- Experience within a professional services firm.
- Knowledge of .NET / C#.
- Experience with relational databases (preferred MS SQL).
- Familiarity with data visualization tools.
- Background in working with structured and unstructured data, embeddings, vector databases, and data pipelines.
- Understanding of responsible AI, data governance, and security considerations in AI system design.

Your future role

- Create **proof-of-concept solutions** for the **A&A function** to increase operational efficiency.
- Delegate to and mentor **junior AI developer** colleagues.
- Break down **new features** into manageable tasks.
- Research **new technologies** for new and existing projects.
- **Collaborate with** the broader development team to establish proper communication between AI functions, frontend, and backend.

Your Qualifications and Skills

- Bachelor's or higher degree in economics/finance, engineering, technology or social sciences; master's degree preferred
- First experience in technology companies, startups, investment firms, financial institutions or consulting is a plus
- Strong entrepreneurial mindset and excitement to work in an ambiguous and results-oriented environment
- Agentic AI workflow building: hands-on fluency with LLMs, prompt workflows, agent frameworks, RAG / knowledge layers, MCPs or tool use, and human-in-the-loop review patterns
- Analytics automation: practical experience with Python, Excel, APIs, and CSV / XLSX workflows to inspect data, automate recurring tasks, and validate outputs
- Data quality engineering: ability to design baseline checks, anomaly detection, output validation, reproducibility checks, and audit trails for research and client-ready outputs
- Basic understanding and interested for financial services, digital solutions, innovations and related macro trends
- Intellectual curiosity along with strong analytical capability and problem-solving skills
- Excellent written and verbal communication skills in English

data science

Experience

- Minimum of 8 years of experience in clinical trial statistics, preferably within a pharmaceutical or CRO setting.
- **Technical Expertise:**
- Advanced proficiency in SAS / R for data analysis and statistical programming.
- Experience with Bayesian methods, predictive modeling, and simulation techniques.
- Proven track record in strategic study design, including adaptive designs, sample size calculations, and interim analysis planning.
- Familiarity with regulatory guidance on statistical methodologies (e.g., FDA, EMA, PMDA).
- Solid experience in applications of advanced statistical methodologies
- Leading roles in regulatory submissions
- Experience in interactions with major regulatory authorities preferred
- Demonstrated statistical expertise and leadership in facilitating and optimizing the (pre/early/full-) clinical development strategy
- **Study Design and Strategy:**
- Ability to lead statistical discussions during protocol development and study planning.
- Skilled in defining statistical analysis plans (SAP) and developing strategic approaches for complex study designs.
- Experience in strategy discussions involving adaptive design, go/no-go criteria, and futility analyses.
- **Collaboration and Communication:**
- Strong communication skills to effectively present statistical concepts to cross-functional teams.
- Proven experience in collaborating with clinical and regulatory teams to align statistical strategy with overall program objectives.

IQVIA is a leading global provider of clinical research services, commercial insights and healthcare intelligence to the life sciences and healthcare industries. We create intelligent connections to accelerate the development and commercialization of innovative medical treatments to help improve patient outcomes and population health worldwide. Learn more at <https://jobs.iqvia.com>

IQVIA is committed to integrity in our hiring process and maintains a zero tolerance policy for candidate fraud. All information and credentials submitted in your application must be truthful and complete. Any false statements, misrepresentations, or material omissions during the recruitment process will result in immediate disqualification of your application, or termination of employment if discovered later, in accordance with applicable law. We appreciate your honesty and professionalism.

Mentés

Qualifications

- PhD or Master's degree in Data Science, Statistics, Computer Science, Engineering, or a highly quantitative discipline.
- 5+ years of progressive experience in advanced analytics, data science, or data engineering, with hands-on exposure to cloud-native platforms (GCP preferred).
- Proven experience in leading and mentoring technical teams, with a track record of translating complex mathematical concepts for non-technical senior executives.
- Deep conceptual and practical understanding of statistical analysis, predictive modeling, and machine learning methodologies.
- Strong leadership skills within a Product Driven Operating Model (Agile/PDO), with the ability to define strategic roadmaps and align cross-functional stakeholders.
- Excellent oral, written, and interpersonal communication skills in English.
- Highly comfortable working with fluid requirements and managing strategic ambiguity.

Preferred requirements:

- 3+ years of direct supervisory experience managing technical data science or engineering teams.
- 3+ years of experience delivering predictive analytics solutions in vehicle sales, regulatory compliance, CO2 fleet management, or environmental sustainability.
- Experience integrating data products with CI/CD pipelines and enterprise-level database architectures.
- Inquisitive, self-driven, and capable of driving organizational change in a global matrix setup.

What we offer:

- Being part of a fully supportive, collaborative and international team -Hungary, Germany, UK and India
- Working in an environmentally friendly and well-equipped office in the XIII. district of Budapest

PYTHON TECHNICAL LEAD – AI & DATA

Responsibilities:

- Making architectural decisions and conducting code reviews,
- Mentoring junior developers and leading the team,
- Designing and building scalable AI data pipelines,
- Developing LLMs (Large Language Models) and AI agent systems,
- Efficiently processing large volumes of data using Python,
- Integrating and optimizing AI/ML models.

Requirements:

- MSc or higher degree,
- 5+ years of Python development experience,
- Experience with cloud platforms (AWS, GCP, or Azure),
- Active proficiency in English.

szervezetek és anyavállalat projektben
való közreműködésben.

Neked való mindez, ha:

- Szakirányú (közgazdasági, matematikusi) felsőfokú végzettséggel rendelkezel.
- Magas szintű adatbázis ismereteid vannak (ORACLE, SQL, SAS, EXCEL, ACCESS).
- Szeretsz problémát megoldani, szívesen dolgozol csapatban és önállóan is.
- Megbízható és pontos vagy.
- Az angol nyelvtudásod aktív.
- Szívesen dolgoznál egy lendületes csapatban, multinacionális, mégis családi környezetben.

Előnyök:

- Hasonló munkakörben szerzett tapasztalat.
- LGD modellezésben való jártasság
- Aktív angol nyelvtudás/használat

Értékeljük a tehetséged:

- Éves bruttó **500 000 Ft-os cafeteria** keretet biztosítunk, melyet gyakorlatilag minden jól ismert elemre felhasználhatsz.
- Próbaidő után kamatmentes lakáscélú hitelfelvétel

Mentés

The knowledge I own:

- Has a background in computer science, mathematics or related technical discipline
- Is experienced in software engineering with exposure to statistical, data science and AI/ML roles
- Has deep knowledge and proven experience with optimizing and operating machine learning models in a production context; hands-on experience deploying and operating LLM-based applications is a strong plus
- Worked with Python in a productive environment (mandatory). Background in programming in C, C++, Java and Scala is beneficial. Exposure to both streaming and batch analytics. Experience with the core data/ML stack is beneficial: SQL, Spark, Pandas, NumPy, Scikit-learn, PyTorch, TensorFlow, Databricks
- Experience with MLOps tooling is beneficial: MLflow or comparable experiment tracking and model registry, workflow orchestration (e.g., Azure Data Factory, Databricks Declarative Automation Bundles), containerization and orchestration (Docker, Kubernetes), CI/CD, infrastructure-as-code, and cloud ML platforms
- Experience with the GenAI/LLM ecosystem is beneficial: Hugging Face, LLM APIs, orchestration frameworks (e.g., LangChain, LlamaIndex), vector databases (e.g., pgvector, Azure/Databricks AI Search), and LLM evaluation/observability tooling
- Has experience working with large data sets, simulation/optimization and distributed computing tools (e.g., Spark, Ray)

Agile / Digital Experience

- Has experience working in AI startup environment or organizations with an agile culture
- Has a professional attitude and service orientation; superb team player

Individual Skills

- Has sound problem-solving skills with the ability to quickly process complex information and present it clearly and simply
- Demonstrates good written and verbal communication skills along with strong desire to work in cross-functional teams

Mindset & Behaviors

- Is able to build a sense of trust and rapport in

What We're Looking For

- Bachelor's or advanced degree in quantitative field such as Mathematics, Computer Science/ Engineering or Finance/Economics with software development experience.
- Proficiency in Python, competence with SQL/ NoSQL databases.
- Interested in financial concepts, including valuation, capital structure and M&A.
- Excellent problem-solving skills, with the ability to work under tight deadlines and manage multiple priorities.
- Strong communication skills, with the ability to present complex ideas clearly to both technical and non-technical stakeholders.
- Be accurate, paying careful attention to detail and working thoughtfully and independently.
- Prior experience in investment banking, management consulting or a similar analytical role is a plus.

BPMM

What You Can Expect From Morgan Stanley

At Morgan Stanley, we raise, manage and allocate capital for our clients – helping them reach their goals. We do it in a way that's differentiated – and we've done that for 90 years. Our values - putting clients first, doing the right thing, leading with exceptional ideas, committing to diversity and inclusion, and giving back - aren't just beliefs, they guide the decisions we make every day to do what's best for our clients, communities and more than 80,000 employees in 1,200 offices across 42 countries. At Morgan Stanley, you'll find an

Requirements

- Strong foundation in machine learning and deep learning fundamentals, with practical experience applying them to model development.
- Hands-on experience implementing neural network or model architectures from scratch.
- Strong understanding of attention mechanisms, RNNs, state-space models, hybrid architectures, or related approaches.
- Solid knowledge of training dynamics, optimization, scaling behavior, and architecture-level performance considerations.
- Understanding of model-level memory, latency, compute, and efficiency constraints.
- Proficiency with PyTorch or JAX and the ability to develop and experiment with research-oriented ML code.
- Ability to evaluate architectural ideas through both theoretical reasoning and empirical experimentation.
- Strong communication skills, with the ability to clearly explain technical concepts and architectural trade-offs.
- Preferred experience with non-Transformer architectures such as RNN variants, state-space models, or long-context systems.
- Preferred background in research-driven startups, open-source machine learning projects, large-scale training, or custom training loops.
- Publications, preprints, notable research contributions, or experience with inference optimization and deployment constraints are advantageous.

Benefits

- Competitive compensation and meaningful equity.
- Opportunity to work directly on core AI model architecture rather than focusing primarily on fine-tuning.
- Significant influence over technical and research direction within a rapidly growing organization.
- Small, high-caliber team with fast feedback loops and a strong research-oriented environment.
- Opportunity to take research concepts from experimentation through to production deployment.
- Full-time position with a globally distributed work

AI Talent Pool

We are continuously building our network of AI professionals for future opportunities.

We are looking to connect with professionals across different areas of **Artificial Intelligence and Machine Learning**, including both **consulting and expert roles as well as technical positions**.

We Welcome Profiles With Experience In Areas Such As

- AI Consultant / AI Expert
- AI Engineer/ Generative AI Engineer
- Machine Learning Engineer
- MLOps / LLMOps Engineer
- AI Solutions Architect
- AI Developer
- AI Product Manager
- AI Governance / AI Compliance Specialist
- AI Research Engineer
- Agentic AI Engineer

Please note that joining the AI Talent Pool does not mean applying for a specific open position. Your profile will be added to our database, and whenever a relevant AI opportunity becomes available, we will review our Talent Pool and **contact suitable candidates first** to discuss the opportunity and potential fit.

We look forward to connecting with you and learning more about your skills and experience. Join the **Qualysoft AI Talent Pool** and be among the first to hear about relevant opportunities and projects that match your expertise.

Jelentkezés 

Mentés

Must-Have Qualifications

- Bachelor's, Master's or PhD in Computer Science, Engineering, Mathematics or related quantitative field.
- 3+ years of experience in ML engineering or AI solution development, ideally with production deployments supporting enterprise or business-facing use cases.
- Familiarity with Azure data & AI services (e.g.: Azure Databricks, Azure ML Studio, Data Factory, Data Lake, Event Hubs, Functions) or GCP equivalents.
- Strong experience with GenAI systems, including LLMs, prompt engineering, fine-tuning, MCP and retrieval-augmented generation (RAG).
- Familiarity with agentic or multi-agent system concepts and architectures.
- Strong programming skills in Python.
- Self-starter mindset with a passion for innovation and experimentation.
- Excellent communication skills in English; ability to present complex architectures to stakeholders.

Preferred Skills

- Hands-on experience with document AI, NLP, semantic search, or knowledge graph solutions.
- Experience with CI/CD pipelines for ML (Azure DevOps, GitHub Actions) and infrastructure-as-code (Terraform or ARM templates).
- Exposure to MLOps practices and tools (e.g. CI/CD, model versioning, MLflow, Kubeflow).
- Hands-on Spark/Databricks expertise.
- Experience building PoCs and MVPs in AI/ML contexts.
- Familiarity with data engineering fundamentals for preparing and curating datasets for experimentation and model training.
- Demonstrated experience acting as a technical lead, owning architecture decisions and guiding other engineers.

What we are proud to provide you with

- Hybrid working with even only weekly 2 office days and flexible working hours based on core time.
- Financial benefits such as an outstanding amount

Tech Stack And Skill Requirements

We work at the cutting edge of ML and sports tech.
You'll ideally bring expertise in:

Must-Haves:

- Python (strong programming fundamentals)
- PyTorch and PyTorch-Ignite
- Linux & Windows 10 experience
- TensorRT for model optimisation
- GIT and collaborative software development

Nice-to-Haves:

- Modern C++ (C++17/20)
- CUDA
- OpenCV
- ClearML
- CMake & Visual Studio
- Typescript & Semantic UI React
- SSH and secure deployment workflows

Bonus Skills:

- QT, JIRA, and Confluence
- TeamCity for CI/CD

Hungary Benefits

- Annual leave in line with local labour law
- Hybrid working model (2 days per week in the office)
- Access to sporting events and tickets
- Sony Group Company discounts

Ready to Make an Impact?

[Jelentkezés](#)[Mentés](#)

Követelmények

- Jelentős gyakorlati tapasztalat ML engineering és MLOps területen, különös tekintettel az ML modellek éles környezetben történő telepítésére, üzemeltetésére, monitorozására, újratanítására és verziókezelésére.
- Magabiztos Python tudás, valamint gyakorlati tapasztalat PySpark vagy Apache Spark használatában.
- Tapasztalat Azure Databricks, MLflow területen. Előnyt jelent az Azure Machine Learning platform tapasztalat.
- Jó ismeretek lakehouse architektúrában, Delta Lake technológiában, többretegű adatplatformokban, adatmodellezésben, adatformálásban, valamint analitikai és ML célú adatszerkezetek tervezésében.
- Alapszintű ismeretek adatminőség, metaadat-kezelés, adatleszármazás (lineage), hozzáférés-kezelési koncepciók, adatirányítás (governance), valamint ML munkafolyamatok vállalati adatplatformokba történő integrációja területén.
- CI/CD folyamatok, Git, Azure DevOps, illetve infrastruktúra-kód eszközök (pl. Terraform vagy Bicep) ismerete.
- Tapasztalat felhőalapú erőforrás-kezelésben, monitorozásban és költségoptimalizálásban.
- Átfogó ismeretek Azure Data/AI megoldások teljes architektúrájáról, beleértve a biztonságot, identitáskezelést, hálózati megoldásokat és a skálázható telepítési mintákat.
- Képesség különböző architektúra-alternatívák értékelésére teljesítmény, biztonság, fenntarthatóság és felhőköltségek szempontjából.
- Tapasztalat külső beszállítókkal való együttműködésben, valamint architektúrák és megoldások szakmai felülvizsgálatában.
- Kiváló kommunikációs és együttműködési készség, beleértve az ügyféligények megértését, a több szakterületet érintő csapatmunkát
- Magabiztos angol nyelvtudás.
- Kiemelkedő numerikus és analitikus gondolkodás.
- Vezetői és mentoráló szemlélet, csapatszellem.
- Ügyfélközpontú és önálló munkavégzés, gyors reagálás az igényekre, rugalmasság, sokoldalúság, proaktív hozzáállás és folyamatos fejlődési igény.
- Elkötelezettség a szabványok és az egységes mérnöki gyakorlatok iránt.

Előnyt jelent

- Francia nyelv ismerete.
- Felsőoktatási rendszerek és folyamatok ismerete.

Amit kínálunk

- Versenyképes alaphér
- SZÉP-kártya cafeteria juttatás
- Magán egészségbiztosítás
- Heti 3 nap home office lehetőség
- Aktív szakmai közösség és rendszeres csapatépítő programok
- Szakmai fejlődés és képzési lehetőségek

Qualifications

- Bachelor's degree in Data Science, Statistics, Computer Science, Economics, or a related field.
- Experience as a Data Analyst, ideally within fintech, subscription products, billing, or customer support.
- Strong SQL skills.
- Experience with popular BI tools such as Tableau, Looker, or similar
- Experience with Python or R
- Solid understanding of statistical analysis, forecasting, and scenario modeling.
- Experience running A/B tests and interpreting experiment results.
- Excellent problem-solving skills, attention to detail, and ability to work in a fast-paced environment.
- Strong communication skills, with the ability to explain findings to both technical and non-technical stakeholders.
- Curiosity, ownership mindset, and the discipline to maintain high-quality data work.

Nice to have

- Experience with BigQuery, ClickHouse, or any cloud data warehouse.
- Basic Python knowledge for data cleaning or simple analysis.
- Exposure to subscription businesses or payment systems.
- Understanding of disputes, chargebacks, declines, or fraud signals.
- Familiarity with DBT or data quality frameworks.

Senior Machine Learning Engineer

EPAM Systems • Hungary (Remote)

Requirements

- Minimum of 3 years programming language experience, ideally in Python, and strong SQL knowledge
- Robust MLOps experience (Sagemaker, Vertex, or Azure ML)
- Intermediate level in Data Science, Data Engineering, and DevOps Engineering
- Experience with at least one project delivered to production in an MLE role
- Expertise in Engineering Best Practices
- Practical experience in implementing Data Products using the Apache Spark Ecosystem (Spark SQL, MLlib/SparkML) or alternative technologies
- Experience with Big Data technologies (e.g., Hadoop, Spark, Kafka, Cassandra, GCP BigQuery, AWS Redshift, Apache Beam, etc.)
- Proficiency in automated data pipeline and workflow management tools, i.e., Airflow, Argo Workflow, etc
- Experience in different data processing paradigms (batch, micro-batch, streaming)
- Practical experience working with at least one major Cloud Provider such as AWS, GCP, and Azure
- Production experience in integrating ML models into complex data-driven systems
- DS experience with Tensorflow/PyTorch/XGBoost, NumPy, SciPy, Scikit-learn, Pandas, Keras, Spacy, HuggingFace, Transformers
- Experience with different types of databases (Relational, NoSQL, Graph, Document, Columnar, Time Series, etc.)

We offer

- Dynamic, entrepreneurial corporate environment
- Diverse multicultural, multi-functional, and multilingual work environment
- Opportunities for personal and career growth in a progressive industry
- Global scope, international projects

Your Skills And Experience That Will Help You Excel

- Excellent Python software development skills, with experience using AI-assisted development tools to improve engineering productivity, software quality, and developer workflows.
- Strong analytical and problem-solving skills, with the ability to critically evaluate AI-generated code, identify subtle defects, challenge assumptions, and deliver robust, maintainable solutions.
- Understanding of equity markets, portfolio construction, or quantitative investment processes, or a strong interest in developing expertise in these areas.
- Excellent communication and collaboration skills, with the ability to work effectively across research, engineering, and business teams.
- Experience designing reusable software libraries, frameworks, APIs, or developer platforms is a plus.
- Experience with Azure, Azure DevOps, CI/CD pipelines, and modern software engineering practices is a plus.

About MSCI

What we offer you

- Salary range: HUF 13,728,000 - HUF 15,101,000 / year plus eligible for annual bonus
- Transparent compensation schemes and comprehensive employee benefits, tailored to your location, ensuring your financial security, health, and overall wellbeing.
- Flexible working arrangements, advanced technology, and collaborative workspaces.
- A culture of high performance and innovation

[Jelentkezés](#)[Mentés](#)

Key Requirements

- BS, MS, or PhD in Robotics, Computer Science, Physics, Mathematics, or related field
- Minimum 3 years of experience in an engineer role
- Strong Python programming and software design skills
- Strong mathematical skills (linear algebra and probability distributions)
- Experience in deep learning frameworks (Pytorch/ Tensorflow)
- Experience in computer vision
- Experience in software development (git, code reviews, unit tests)
- Ability to work independently and systematically

Considered as a plus

- Programming in C++, working in Linux
- Experience in machine learning and data analysis
- Experience in Docker, Jenkins, Kubernetes
- Experience in robotics
- Experience in developing safety critical, embedded, or real-time systems
- Experience in computer graphics, physics simulation or other mathematics-intensive applications

What We Offer

- Competitive salary
- Fitness opportunities
- Corporate health insurance package
- Free lunch every office day, nearby at one of the best all-you-can-eat restaurants in Budapest or delivered by Wolt for Work
- Work on the hottest applied research problem in an agile working culture, backed by a strong, stable and future proof industrial partnership

teams on data-sharing boundaries and formats

What We Are Looking For

- 3+ years data engineering experience; strong Python and SQL
- Experience with data versioning tools (DVC, LakeFS, or similar) and pipeline orchestration (Airflow, Dagster, or similar)
- Understanding of ML-specific data concerns: train/test leakage, label noise, distribution shift
- Rigor in documentation and reproducibility

Why You'll Love Working Here

- Innovative Environment: Join a team at the forefront of cybersecurity innovation. At OPSWAT, you'll have the opportunity to work with cutting-edge technologies and contribute to solutions that shape the future of cybersecurity.
- Collaborative Culture: We foster a culture of collaboration, where every team member's input is valued. You'll have the chance to work alongside talented individuals who are passionate about

Jelentkezés 

Mentés

What You Bring

- Strong engineering fundamentals plus production AI/ML experience
- Deep Python and modern AI frameworks; generative AI, LLM orchestration, prompt engineering, RAG / grounded systems
- Grounding and evaluation: keeping AI honest against a source of truth, guardrails, honest failure modes
- API-based architecture and data engineering: clean integration boundaries into enterprise systems
- Data & analytics as a co-equal strength: strong SQL, log/telemetry analysis on large messy datasets
- Observability engineering: monitoring, dashboards, telemetry pipelines
- MLOps, CI/CD, and production monitoring of AI systems
- Cloud-native: SAP BTP preferred, or comparable (AWS / Azure / GCP)

Bring out your best
