

← Preferenciák egyezése

Preferenciák

- ☒ Hybrid
- ☒ Teljes munkaidős

Készségek

- ☒ Python (Programming Language)
- ☐ Artificial Intelligence (AI)
- ☐ Software Engineers
- ☐ Generative AI
- ☐ Large Language Models (LLM)
- ☐ FastAPI
- ☐ REST APIs
- ☐ Retrieval-Augmented Generation (RAG)
- ☐ AI Agents
- ☐ LangChain

Skills

- Strong Python and solid SQL
- Unstructured-data pipelines: transcripts, mail, chat, documents — parsing, normalisation, deduplication
- Embedding / retrieval infrastructure: chunking strategies, vector stores (pgvector, OpenSearch, Pinecone-class), plus loading a graph store
- API and connector integration at scale: Google Workspace / M365, Slack, CRM; rate limits, pagination, incremental cursors, webhooks
- Entity resolution / record linkage (deterministic + fuzzy) without a clean shared key
- Orchestration: Airflow, Step Functions or equivalent; idempotent, restartable jobs
- AWS and/or GCP data stack; comfortable in a private / VPC deployment
- PII detection, redaction, encryption and retention in practice
- Clear written English; documents for handover and works well async in a small distributed pod

Knowledge

- GDPR applied to employee-generated data (mail, chat, meeting recordings) and EU data residency across multiple jurisdictions
- Data lineage, provenance and audit patterns — and why an AI system needs them more, not less
- How retrieval quality depends on ingestion quality — enough understanding of RAG to make the right upstream choices
- Well-Architected security and cost practice; awareness of financial-services expectations — a plus

Experience

- 4+ years in data engineering, with real unstructured / semi-structured work (not only warehouse modelling)
- Demonstrated experience integrating many third-party APIs into one coherent store, including historical backfill
- Experience building pipelines feeding an LLM / retrieval system — strong plus
- Experience handling sensitive personal data in a regulated or security-sensitive environment
- Comfortable being the only data engineer on a small (2.5-FTE) pod, at part-time allocation, without hand-holding

Mentés

Your profile:

- 5+ years of experience in Workday Reporting and Analytics, including hands-on experience with Prism Analytics, Discovery Boards, Worksheets, and Slides.
- Strong working knowledge of Workday HCM and experience supporting additional Workday modules such as Recruiting, Learning, Compensation, and Payroll.
- Demonstrated experience aggregating and analyzing data across multiple sources and reporting tools.
- Proficiency in Excel (advanced formulas, pivots; macros a plus) and experience performing ad hoc analysis.
- Experience with business intelligence and data visualization tools (e.g., Power BI, Tableau, Qlik).
- Working knowledge of data platforms and technologies such as SQL and cloud data environments (Azure, AWS, or GCP).
- Strong ability to communicate technical concepts and data insights to non-technical audiences clearly and concisely.
- Proven ability to manage multiple priorities and collaborate effectively in a global, cross-functional environment.
- Bachelor's degree in Business, Analytics, Mathematics, Economics, or equivalent professional experience.

Preferred Qualifications

- Proficiency in SQL; experience with Python or other analytics scripting languages is a strong plus.
- Experience in People Analytics, applied statistics, or workforce analytics.
- Exposure to predictive or trend-based analysis (e.g., employee retention, performance, workforce planning).
- Experience supporting manufacturing, engineering, or sales organizations.
- Knowledge of continuous improvement methodologies such as Lean Six Sigma, DMAIC, or Agile.
- Ability to influence stakeholders, balance competing priorities, and drive adoption diplomatically.
- Ability to travel as required.

Key Skills & Competencies

- Strong analytical and creative problem-solving skills
- High attention to detail and technical writing capability
- Superior learning agility and comfort working in ambiguity
- Consultative mindset with strong stakeholder partnering skills
- Ability to develop buy-in and drive sustainable reporting solutions

Flowserve is a world-leading manufacturer and aftermarket service provider of comprehensive flow control systems. Join a company whose people are committed to building a more sustainable future to make the world better for everyone. With 16,000+ employees in 50+ countries, we combine our global reach with local presence. Our team challenges themselves to approach each situation with ingenuity and creativity to help provide our customers with the most innovative flow control products and services. We support 10,000+ customers worldwide, creating products to meet the needs of our customers who are supplying energy, fresh water, pharmaceuticals and other essentials to consumers, businesses and governments globally. We invite you to put your talents and career in motion at Flowserve.

Req ID : R-32026

Job Family Group : Human Resources

Dein Profil

Wir suchen einen talentierten und erfahrenen **Data Architect** mit fundierter Expertise in Datenintegration, Datenmodellierung und Analytical Engineering. Der ideale Kandidat bringt sowohl technische Tiefe als auch bereichsübergreifende Kommunikationsfähigkeiten mit, bewegt sich souverän zwischen High-Level-Architekturdesign und praktischer Umsetzung und fühlt sich in kollaborativen, schnelllebigen Umgebungen mit einer Produkt-Denkweise für Daten wohl.

Muss-Kriterien

- Mindestens 5 Jahre Erfahrung in Datenarchitektur, Data Engineering oder einer eng verwandten Rolle
- Ausgeprägte Kenntnisse in Datenmodellierungstechniken: relational, dimensional (Kimball/Inmon) und Data Vault
- Praktische Erfahrung mit Datenintegrationstools und Frameworks (z.B. Apache Kafka, dbt, Spark, Talend oder ähnliche)
- Fundiertes Verständnis von Cloud-Datenplattformen (AWS, GCP oder Azure) und modernen Data-Stack-Komponenten
- Fortgeschrittene SQL-Kenntnisse
- Vertrautheit mit Python oder Scala für Data-Engineering-Aufgaben
- Nachgewiesene Fähigkeit, Geschäftsanforderungen in skalierbare Datenarchitekturlösungen zu übersetzen
- Bereichsübergreifende Kommunikationsfähigkeiten
- Fähigkeit, komplexe Datenarchitekturentscheidungen sowohl technischen als auch nicht-technischen Zielgruppen klar zu vermitteln

Von Vorteil

- Erste Erfahrung mit ereignisgesteuerten Architekturen oder Echtzeit-Datenplattformen
- Erfahrung in agilen, wertstromorientierten Produktorganisationen
- Vertrautheit mit Data-Mesh-Prinzipien und dezentralen Datenverantwortungsmodellen
- Kenntnisse in Data-Governance-Frameworks und Metadaten-Management-Tools (z.B. Collibra, Alation, DataHub)

What we expect from you:

- Bachelor's or Master's degree in **Data Science, Business Analytics, IT, Computer Science**, or related field
- **5+ years** of experience in Data / BI, including **5+ years in a leadership role**
- Strong experience in **data modeling and ETL/ELT processes**
- Experience in building **Datawarehouse (DWH)** solutions for Customers
- Knowledge of **Big Data and cloud solutions**, e.g. Azure Data Lake
- Experience with **CI/CD** in data driven or analytics environments
- Strong hands on knowledge of **Power BI** (or similar platforms such as Tableau or Qlik)
- Experience with **Microsoft Fabric or Azure Synapse Link** is a strong advantage
- Solid understanding of **business impact of BI and analytics**
- Proven ability to translate business needs into scalable technical solutions
- Strong project management mindset, preferably in **Agile (Scrum/Kanban)** environments
- Excellent communication skills and fluency in **English**
- Strategic thinking combined with practical, hands on leadership

About Your Experience And Skills

- Education
- University or college degree with specialization in Computer Science or Information Systems or equivalent practical experience
- Experience
- 3+ years of experience in Data Engineering or similar role
- Experience with distributed data processing (Apache Spark)
- Experience working with cloud-based data platforms (preferably Databricks)
- Exposure to running and supporting production data pipelines
- Experience troubleshooting data issues in live environments
- Ability to work in a geo-distributed team with limited supervision
- Professional and Technical Competencies
- Hand-on Experience with Azure Databricks and/or Apache Spark
- Understanding of Lakehouse architecture and Delta Lake
- Knowledge of orchestration tools (ADF, Airflow, Databricks Workflows) and CI/CD tools
- Understanding of monitoring and logging in data platforms (Datadog, Azure Monitor)
- Strong programming skills (Python preferred, Java optional)
- Professional usage of Microsoft Office Suite.
- Experience with Atlassian JIRA, Confluence.
- Basic understanding of data security and scalability principles
- Experience collaborating with cross-functional teams
- Soft Skills
- Strong problem-solving and analytical skills.
- Self-driven, detail-oriented, capable of multi-tasking, highly organized, with excellent time management skills.
- Demonstrated ability to meet deadlines, handle and prioritize simultaneous requests, and manage laterally and upwards
- Strong written and verbal communication skills in English for cross-functional collaboration.
- Ability to critically evaluate information gathered from multiple sources, reconcile conflicts, decompose high-level information into details, and distinguish user requests from the underlying true needs.
- Strong attention to detail and commitment to delivering high-quality work.
- Proactive mindset with a positive attitude and a strong sense of ownership, and team mentality.
- Growth mindset with a passion for continuous learning, adapting, and staying updated on industry trends and best practices.
- Openness to work with different cultures across CEE.

What We Offer

- Work with an advanced and innovative tech stack.
- Collaborate with multinational teams and projects across the CEE region.
- Enjoy tremendous opportunities for continuous learning and growth in a fast-paced, agile environment.
- Explore versatile career paths in a dynamically growing international organization at Local and Group level.
- Gain cross-industry experience through our expanding portfolio of businesses (both within and beyond MOL Group).
- Be part of a supportive and inclusive workplace that values innovation and creativity.
- Enjoy a hybrid work model- two days of home

Requirements

- 2–3 years of relevant experience in data, ETL, data migration, or a similar role
- 2-3 years of hands-on SQL knowledge.
- at least 1-2 year of experience with Python
- Proven track record of working with Pandas and/or pySpark
- Hands on experience with current AI chat and coding tools
- Advanced Excel skills
- Good communication skills in English, both written and spoken.
- Strong analytical and problem-solving skills.
- A proactive mindset with a focus on continuous improvement.
- Ability to manage multiple priorities and switch effectively between tasks.

Nice to have

- Experience with Snowflake / Dataiku / Impala / db2.
- Multinational company experience

Jelentkezés 

Mentés

What You'll Bring

- 5+ years of experience in Business Intelligence, Analytics Engineering or a similar role.
- Advanced SQL skills and experience working with large analytical datasets.
- Strong experience building dashboards and reports using Metabase or a similar business intelligence platform.
- Experience working with Amazon Redshift and relational databases.
- Strong understanding of dimensional modelling and semantic layer design.
- Experience defining business metrics, KPIs and reporting standards.
- Ability to independently investigate business and data issues from identification through resolution.
- Excellent communication and stakeholder management skills.
- Proactive mindset with strong ownership and accountability.

What's In It For You

- remote first company in pursuit of sustainability
- A competitive salary + individual performance based bonuses every quarter
- 28 days paid annual leave
- Our core working hours are 10am-3pm in your local time zone with flexibility outside of this
- Referral bonuses & flash bonuses
- Top of the line equipment
- Annual company retreats to provide great internal networking opportunities

Interview Process

- Remote video screening with our Talent

[Jelentkezés](#) 

[Mentés](#)

You are the ideal candidate, if you have:

- Minimum 3 years of experience in a Data Engineering role
- Strong Python coding skills (experience with Pandas and NumPy is a plus)
- Deep understanding of SQL and experience with relational databases
- Experience with Cloud platforms (GCP preferred)
- Experience with Orchestration tools (e.g. Airflow)
- Solid understanding of Cloudera Hadoop technology stack (Apache Spark, Hive, HDFS)
- Knowledge of data handling principles, including ETL processes and real-time data processing
- Fluent in English, both written and spoken

It's an advantage if you have:

- Bachelor's or Master's degree in Computer Science, Software Engineering, Data Science or related field
- Experience with CI/CD pipelines and automation tools
- Strong understanding of data governance principles, including metadata management and data quality frameworks
- Experience with Data Mesh and Data Product concepts
- Experience in international or multi-country data projects is preferred
- TELCO technical knowledge
- Strong communication skills to translate technical findings into business-oriented insights
- Self-starter with a continuous learning mindset and strong attention to detail.

Benefits:

- The opportunity to work on cutting-edge network technologies and shape the future of telecommunications. Flexible working hours with partial home office options. Comprehensive benefits package (laptop, mobile phone, cafeteria, insurance). Employee discount rates on Telekom services. Modern, multinational working environment with amenities like a sky bar and rooftop gym. Access to our Employee Assistance Program. Comprehensive Healthcare Package You will receive a minimum of 25 days of basic vacation per year (based on age) We offer 15 days of additional vacation if you become a father, with 100% pay

Training opportunities:

- You'll have access to thousands of professional and skills development materials from our extensive digital training palette We offer regular internal training sessions and workshops You can learn English and German, even with a native speaker You'll have access to Percipio and Coursera courses

Elvárások

Elvárt tapasztalat és tudás

- Több éves projekt tapasztalat a CRM / marketing / customer experience területén

(pl. Microsoft Dynamics 365 vagy ahhoz hasonló CRM / marketing platformok)

- Magabiztos üzleti és ügyfolyamat-ismeret, különösen az alábbi területeken:
- Lead management
- Kampánykezelés
- Customer journey-k
- Ügyfélszegmentáció
- Tapasztalat legalább az egyik alábbi megoldással:
- Microsoft Dynamics 365 Customer Insights (Data és/vagy Journeys)
- vagy más, hasonló Customer Data Platform (CDP) megoldás
- Jó ismeretek a Microsoft Power Platform világában
- Alapszintű adatmodellezési és SQL-ismeretek
- Erős tanácsadói szemlélet, strukturált gondolkodás és ügyfélközpontú megközelítés

Amit ez a pozíció kínál

- Részvétel komplex, adatvezérelt Customer Experience projektekben
- Tanácsadói és fejlesztői feladatok kombinációja
- Ügyfolyamatok stratégiai szintű alakítása modern Microsoft megoldásokkal
- Olyan környezet, ahol az adat, az elemzés és az ügyfélméltény valódi üzleti értéket teremt

 **Ha otthonosan mozogsz a CRM, Customer Insights és Data & Analytics világában, és szívesen segítesz ügyfeleknek jobb ügyfélméltényt kialakítani, várjuk jelentkezésed!**

További információk

- Please be informed that our remote working possibility is only available within Hungary due to European taxation regulation.
