

### **The knowledge I own:**

- 5+ years of professional experience in data engineering, analytics engineering, BI engineering or a similar data-focused role
- Strong SQL skills and experience writing complex queries involving joins, aggregations and performance optimization
- Experience working with relational databases and large datasets
- Solid understanding of data modeling concepts and relational data structures
- Experience building data pipelines, ETL processes or analytical data models
- Ability to translate business questions into data solutions and analytical models
- Experience collaborating with business stakeholders and participating in requirement workshops
- Practical experience using Git for version control and collaborative development
- Experience working in an agile development environment
- Strong analytical thinking and the ability to understand relationships between complex datasets
- Growth-oriented mindset with willingness to learn new platforms and technologies
- Comfortable working in an environment that includes operational responsibility; on-call participation may be required later

### **Nice-to-have:**

- Experience with process mining platforms (e.g., Celonis, Signavio, UiPath)
- Experience working with ERP systems such as SAP or other enterprise systems
- Experience with Python for data processing or machine learning
- Experience designing analytical dashboards or BI solutions
- Familiarity with large-scale enterprise data environments and real-time analytics
- Experience working with event-based or process-oriented data models
- Understanding of supply chain, finance or purchasing business processes

### **AI/ML affinity:**

- Experience working with machine learning or AI-driven analytics use cases

**AI/ML affinity:**

- Experience working with machine learning or AI-driven analytics use cases
- Interest in integrating AI capabilities into operational analytics and process monitoring
- Openness to using AI-assisted development tools to improve productivity and code quality

concrete execution roadmaps, driving rapid implementation from prototype to production.

- You will architect scalable solutions and drive critical milestones to position the new department for rapid growth and potentially a spin-off to attract institutional backing.

## Requirements

- You are based in Europe or the Americas (or open to relocate/remote arrangements).
- You have a high-agency builder mindset, with proven domain expertise and the drive to take extreme end-to-end ownership.
- You have excellent verbal and written communication skills in English.

Join us to build cutting-edge technology and category-defining initiatives from the ground up!

**Jelentkezés** 

**Mentés**

## Role Requirements

- Bachelor's or advanced degree in quantitative field (e.g., Mathematics, Computer Science/ Engineering or Finance/Economics) with software development experience.
- At least 3-4 years relevant experience in a programming or quantitative role.
- Strong programming skills in at least one general purpose programming language (including but not limited to Python, C++, Java, JavaScript). Experience with distributed computing environments.
- Knowledge of system design patterns and experience in system architecture.
- Experience leveraging AI-assisted development tools (e.g., GitHub Copilot or other LLMs).
- Excellent stakeholder management skills, ability to build a network of trusted partners in a global organization and collaborate across all seniority levels.
- Strong time management skills, with ability to work on simultaneous items across multiple stakeholders with short lead times.

## What We Are Looking For

We are definitely looking for you, if you recognize yourself in the following lines:

- ◆ University degree in Financial Mathematics, Actuarial Sciences, Econometrics, Physics or related discipline
- ◆ Affinity with mathematical modelling. Ideally, practical knowledge of financial derivatives, including the techniques to price them
- ◆ Attention to detail, good analytical and communication skills in English, both oral and written
- ◆ Practical and pro-active hands-on approach - you can combine rigorous mathematical thinking with a practical business flavour
- ◆ Programming experience in Python and/or VBA is an advantage

## Your Main Responsibilities Will Include

- ◆ Perform calibration of stochastic financial mathematical models of interest rates, equities, and FX rates, using current market data like swap prices, swaption volatility surfaces, equity indices, and FX rates
- ◆ Generate interest rate curves and risk-neutral economic scenario sets for regulatory purposes (Solvency II, replicating portfolio for NN Group's SCR internal model, movement analysis and market-consistent valuations under IFRS 17)
- ◆ Calculate illiquidity premia (ILP) for market-consistent valuations under IFRS 17
- ◆ Create non-standard risk-neutral and real-world scenario sets for pricing, ALM, ORSA and other regulatory purposes
- ◆ Maintain and enhance internal processes and end-user developed applications
- ◆ Support the maintenance and development of the applied financial mathematical models
- ◆ Consult with users and stakeholders, including Business Units and Head Office of NN Group

## What Else We Can Offer

- ◆ Opportunity to work from home and the office as well, based on your choice
- ◆ Flexible working hours

## Requirements

- 5+ years of experience in AI/ML engineering with proven leadership in architecting enterprise-grade solutions
- Expertise in LLMs, foundation models and multi-agent systems
- Proficiency in designing production AI platforms with modular pipelines and governance frameworks
- Background in hybrid AI systems combining agentic AI, traditional ML and symbolic reasoning
- Knowledge of knowledge graphs and multi-source knowledge fusion
- Competency in MLOps/AIOps practices including A/B testing, model versioning and automated retraining
- Capability to design evaluation frameworks covering technical, human-centered and contextual metrics
- Understanding of business problem analysis and translating requirements into solutions with measurable ROI
- Showcase of strong cross-functional collaboration and stakeholder management
- Familiarity with security, compliance standards and emerging AI research trends
- English proficiency at B2 level or higher

## We offer

- Dynamic, entrepreneurial corporate environment
- Diverse multicultural, multi-functional, and multilingual work environment
- Opportunities for personal and career growth in a progressive industry
- Global scope, international projects
- Widespread training and development

[Jelentkezés](#) 

[Mentés](#)

## **Te vagy az ideális jelölt, ha:**

- Rendelkezel legalább 5 év szoftverfejlesztési tapasztalattal AI-fókusszal (NLP, LLM, RAG).
- Magabiztosan programozol Pythonban (clean code, típusos Python 3.11+, async/await, Pydantic).
- Van gyakorlatod retrieval-architektúrákban (RAG, hibrid keresés, vektor adatbázisok).
- Jártas vagy a tesztelésben és kódminőség-biztosításban (pytest, mocking, quality gate).
- Tapasztalt vagy konténerizált környezetekben (Docker).
- Dolgoztál már éles termékkörnyezetbe kerülő szoftvereken, termékszemlélettel.
- Ismered az iteratív fejlesztési kereteket (CRISP-DM, SDLC).
- Képes vagy automatizált kiértékelési pipeline-ok, benchmark rendszerek tervezésére.
- Aktív B2+ angol nyelvtudással rendelkezel.
- Gyorsan tanulsz, jól alkalmazkodsz és erős analitikus gondolkodással rendelkezel.
- Proaktívan, felelősségteljesen és hatékonyan dolgozol, önállóan és csapatban is.

## **A pályázásod során előnyt jelenthet, amennyiben:**

- AWS vagy Azure OpenAI tapasztalat.
- MCP (Model Context Protocol) és modern API szabványok ismerete.

## **Mi az, amit mi biztosítunk?**

- Családbarát munkahelyet, kötetlen munkaidővel, rugalmas hozzáállással.
- Stresszmentes környezetet, ahol nagy hangsúlyt kap a work-life balance.

**Jelentkezés** 

**Mentés**

#### **Skills needed:**

- Degree in computer science or a similar field
- Advanced coding skills in Python (preferred) or Java, with solid understanding of software engineering principles
- Experience with backend frameworks (FastAPI, Flask, Django) and microservice architectures
- Familiarity with containerization and orchestration tools (Docker, Kubernetes, GitHub Actions, MLFlow)
- Experience implementing CI/CD and MLOps pipelines in cloud environments (Azure ML, Databricks, AWS)
- Hands-on experience with data ETL, APIs and model deployment workflows
- Knowledge of distributed systems and data platforms for big data
- Understanding of Agile, SAFe methodologies and collaborative engineering practices
- Fluent English and a proactive, problem solving mindset

#### **Nice to have (not a must):**

- Experience with multi-agent or generative AI frameworks (e.g., LangChain, CrewAI)
- Familiarity with SAP AI Core, SAP BTP
- Experience with agile frameworks (e.g., Scrum, SAFe) and project management tools (e.g., Jira)

For more information – please apply for this job or send your CV directly to [cristiana@cavendishprofessionals.com](mailto:cristiana@cavendishprofessionals.com)

**Cavendish (Recruitment) Professionals Ltd** are proud to be an equal opportunity employer and we believe that inclusivity begins with the candidate experience. All qualified applicants will receive consideration for employment regardless of, gender, race, age, sexual orientation, religion, or belief.

## Key Skills And Experience

### You must have:

- 5+ years of professional experience in brand strategy, marketing research, or marketing analytics, ideally within a global or enterprise-level organization.
- Experience applying brand equity models, performance metrics including NPS, marketing funnel, and brand sentiment.
- Ability to synthesise data from different sources to build a cohesive narrative.
- Strong grasp of statistical analysis and the ability to interpret complex datasets to identify correlations between brand health and business outcomes.
- Expertise in SQL for retrieving and joining raw datasets and advanced Excel (Power Query and Pivot Tables) to clean, restructure, and validate complex data for analysis.
- Proficiency in Python for automating repetitive reporting tasks and performing NLP-based sentiment analysis on open-ended feedback and leveraging AI tools to accelerate hypothesis testing and market modelling.
- Proven ability to translate technical findings into executive-level narratives.
- Proficiency in dashboarding tools such as Tableau, Power BI, or Google Data Studio to translate raw data into visual insights.
- Familiarity with survey tools and panels (e.g., Qualtrics, SurveyMonkey, or Toluna) and digital analytics suites (e.g., Google Analytics or Adobe Analytics).
- Expertise in competitive benchmarking and identifying macro-trends that impact brand perception and category dynamics.
- A collaborative mindset with the ability to build relationships with a diverse stakeholder network.
- A proactive drive to stay ahead of market research trends and emerging data methodologies to keep the organization's brand measurement robust.
- Outstanding communication and presentation skills.

### It would be beneficial if you also had:

- MBA or advanced degree in Marketing, Data science, Business, or a related field.
- Proven record of managing research vendors and ensuring high-quality deliverables within budget.
- Firsthand experience with social intelligence platforms.
- Experience working in a B2B2C or hybrid B2B/B2C environment.
- Multilingual capabilities and/or experience working across multiple geographies and cultures.
- Comfortable in high-pressure, fast-paced environments.

Jelentkezés [↗](#)

Mentés

Miért izgalmas ez a lehetőség?

- A PwC GenAI Lab dinamikusan fejlődő csapatahoz csatlakozhatsz, ahol Magyarország vezető szakértőitől tanulhatsz;
- Vállalati működési modelleket, folyamatokat alapjaiban változtathatsz meg a technológia segítségével;
- Megismerkedhetsz a legkülönbözőbb iparágak szereplőivel;
- Alkalmad nyílik a gyors fejlődésre, és munkádért versenyképes javadalmazásban részesülhetsz;
- Kihívást jelentő feladatok és dinamikus munkakörnyezet vár;
- Változatos feladatokkal és nagyvállalati ügyfelekkel foglalkozhatsz hazai és nemzetközi projekteken;
- On-prem és felhő alapú technológiákban szélesítheted univerzális vagy mélyítheted speciális tudásodat.

Feladataid a következők lesznek:

- Nagy nyelvi modellekre (LLM) épülő, RAG (Retrieval-Augmented Generation) és agentic alapú rendszerek aktív fejlesztése, a koncepciótól a működő prototípusig.
- Innovatív megoldások kidolgozása, a legújabb generatív AI trendek és kutatási eredmények folyamatos követése és gyakorlati alkalmazása.
- Szoros együttműködés a vállalati különböző üzletágaival és belső döntéshozóival új felhasználási lehetőségek azonosítása és implementálása céljából.
- Önálló felelősségvállalás Proof of Concept (PoC) projekteken, a tervezéstől a leszállításig. Munkádat senior szakértőinkkel szoros együttműködésben végzed, biztosítva a magas minőségű eredményeket és a folyamatos szakmai fejlődésedet.

A kiválasztási folyamatban sikeres lehetsz, ha rendelkezel az alábbi kompetenciákkal:

- Szakmai Tapasztalat: Minimum 2-3 év releváns szoftverfejlesztői tapasztalat, amelyből legalább 1 év kimondottan RAG és/vagy agens alapú (Agentic) AI rendszerek fejlesztésével telt.
- Programozás: Magabiztos, haladó szintű Python tudás, beleértve az aszinkron programozás és a multiprocessing technológiák gyakorlati ismeretét.
- AI/LLM Ökoszisztéma: Multi-agent rendszerek, guardrail megoldások és orkesztrációs keretrendszerek (pl. LangGraph) alapvető ismerete és használata.
- Context Engineering: Haladó szintű kontextusépítési stratégiák ismerete és alkalmazása a modellek teljesítményének maximalizálására.
- Adatkezelés: Különböző adatbázisok magabiztos használata, különös tekintettel a vektoradatbázisokra.
- Szoftverfejlesztői Szemlélet: Erős szoftverfejlesztői alapok, CLEAN kód írásra való törekvés
- Személyes Kompetenciák: Kiváló csapatjátékos vagy, de képes vagy önállóan is felelősséget vállalni. Proaktív, megoldásorientált hozzáállás jellemez.
- Nyelvtudás: Magabiztos, legalább középfokú angol nyelvtudás.

A pályázatok elbírálásánál előnyt jelent:

- Szervenvény a nyelvi modellek és a körülöttük lévő, dinamikusan fejlődő ökoszisztéma iránt; ha a terület vezető kutatóitól és a legfrissebb publikációkból tanulsz.
- Multi-agent rendszerek architektúráis mintáinak (pl. hierarchikus, kollaboratív modellek) ismerete és tervezési tapasztalata.
- Jártasság az LLM rendszerek monitorozásában és automatizált kiértékelésében.
- Mélyebb elméleti tudás, például a Transformer architektúra működésének részletes ismerete.
- Gyakorlati tapasztalat LLM-alapú rendszerek specifikus tesztelési módszertanaiban.
- Folyamat-automatizációs eszközök ismerete, különösen az n8n platformon, és Copilot Studio-val szerzett tapasztalat.
- Gyakorlati tapasztalat valamely felhőplatformon (elsősorban Azure), valamint konténerizációs technológiák (Docker, Kubernetes) alapszintű ismerete.
- Szélesebb körű gépi tanulási algoritmusok és technikák gyakorlati alkalmazásában szerzett jártasság.

Miért válassz bennünket?

- Változatos feladatokkal teli munkakörnyezet és folyamatos szakmai fejlődés: nálunk lehetőség nyílik arra, hogy tapasztalatot szerezz, miközben fejleszted képességeidet egy ösztönző, támogató közegben.
- Rugalmas munkarend és home office lehetőség: igény szerint te oszthatod be a munkaidődet, és részben otthonról is dolgozhatsz.
- Támogatás a tanulás és fejlődés útján: számos üzleti és digitális tréning, valamint egyéb workshopok várnak, hogy folyamatosan fejleszthesd személyes és szakmai képességeidet.
- Sokszínű juttatási csomag az alapbérn felül: éves bónusz rendszerünkön felül minden kollégánknak SZÉP-kártya, home office támogatás és magán egészségügyi szolgáltatás biztosított. Céges sportolási lehetőségek, edzőtermi kedvezmények és változatos egészségmegőrző programok

## Qualification Requirements

- Graduate degree in biostatistics or related discipline.
- Extensive experience in clinical trials or an equivalent combination of education and experience, demonstrated by the ability to lead multiple projects and programs of studies.
- Proficiency in R programming.
- Ability to apply extensive knowledge of statistical design, analysis, relevant regulatory guidelines, and programming techniques utilized in clinical research and to effectively communicate statistical concepts.
- Experience across all statistical tasks required to support clinical trials during the lifecycle of the project, from protocol to CSR.
- Experience with regulatory submissions preferred.
- Excellent written and verbal communication skills.
- Ability to read, write, speak, and understand English.

## Get to know Syneos Health

Over the past 5 years, we have worked with 94% of all Novel FDA Approved Drugs, 95% of EMA Authorized Products and over 200 Studies across 73,000 Sites and 675,000+ Trial patients. <

### Requirements:

- 5+ years building production ML/AI systems; 2+ years at senior/lead level.
- Strong Python engineering (testing, packaging, code quality, performance profiling).
- Hands-on experience with LLMs and agentic AI in real systems (tool calling, orchestration, workflow integration).
- Experience adapting LLMs (LoRA/QLoRA/PEFT or equivalent) and evaluating quality/safety.
- Experience implementing RAG and operating retrieval components in production.
- Strong MLOps fundamentals: containers, CI/CD, model/service versioning, monitoring.
- API/service development: REST/gRPC, auth, rate limits, error handling, resilience patterns.
- Comfortable operating in cloud environments (AWS/GCP/Azure) with production constraints.

### Benefits:

- Inference optimization: quantization, batching/caching, GPU serving (e.g., vLLM/TGI or similar).
- Agent safety engineering: prompt injection

**Egyszerű  
jelentkezés**

**Mentés**

## What You'll Do

You'll be a core contributor to the engine behind our platform, working on systems that process massive, complex datasets and turn them into real-world impact.

- Design and write **clean, scalable Python code** to solve challenging, real-world problems
- Build and maintain APIs and data pipelines using **FastAPI, SQLAlchemy, and Pandas**
- Support and integrate **machine-learning workflows** into production systems
- Store, process, and optimize **2D, 3D, and GIS data** at city scale
- Collaborate closely with data scientists, ML engineers, and product teams

## What We're Looking For

- Strong Python skills and **solid algorithmic thinking**
- A **team-first mindset** and comfort working in a collaborative, fast-moving environment
- Curiosity, ownership, and a problem-solving attitude

## Nice to Have

- Experience working with **urban, geospatial, or spatial data**
- Familiarity with **Docker, Kubernetes, and cloud platforms**
- Previous experience in a **startup or scale-up** environment

## Why Join Us

- Make a **direct impact on climate adaptation** and the future of cities through technology that actually gets used
- Work on **meaningful, real-world problems** at the intersection of **AI, sustainability, and urban tech**
- Join a **fast-growing, international team** with real freedom to shape both the product and your role
- Learn, experiment, and grow with **talented, curious (green-)tech experts** who genuinely care about what they build

## What We're Looking For:

- Proven experience engineering robust AI solutions with a proactive, problem-solving consultant mindset.
- Deep understanding of software engineering principles, distributed systems, and big data platforms.
- Strong familiarity with **Agile/SAFe methodologies** and collaborative engineering practices.
- Familiarity with multi-agent or generative AI frameworks (**LangChain, CrewAI**) and **SAP AI Core** is a strong plus.

## Must-Haves:

- Advanced coding skills in **Python (preferred)** or **Java**, along with backend frameworks (**FastAPI, Flask, Django**).
- Hands-on experience with **containerization** and **orchestration tools** (**Docker, Kubernetes, GitHub Actions, MLFlow**).
- Solid experience implementing **CI/CD and MLOps pipelines in cloud environments** (**Azure ML, Databricks, AWS**).
- Fluent English for daily communication.

### **Téged várunk, ha van:**

- Több éves tapasztalatod AI engineering, ML engineering vagy szoftverfejlesztési területen
- Magabiztos Python tudásod, valamint tapasztalatod production-ready, jól karbantartható kód fejlesztésében
- Gyakorlatod nagy nyelvi modellekre épülő alkalmazások fejlesztésében vagy integrációjában, különösen RAG vagy agentikus megoldások esetén
- Tapasztalatod AI vendor megoldások integrációjában és műszaki hangolásában
- Ismereted REST API-k, microservice architektúrák és enterprise integrációs minták terén
- Tapasztalatod konténerizációs és cloud környezetekkel (pl. Docker, Kubernetes)
- CI/CD és MLOps szemléleted
- Jó kommunikációs készséged és szakmai angol nyelvtudásod

### **Előnyvel indulsz nálunk, ha van:**

- Tapasztalatod LLM fine-tuning területen (pl. PEFT, LoRA, qLoRA)
- Tapasztalatod multi-agent rendszerek fejlesztésében
- Ismereted model serving frameworkökről (pl. vLLM, Triton, BentoML, KServe)
- Tapasztalatod MLOps és monitoring eszközökkel (pl. MLflow, Airflow, Kubeflow, Prometheus, Grafana stb.)
- Gyakorlatod GPU/CUDA környezetekkel
- Ismereted distributed adatfeldolgozási keretrendszerekről (pl. Spark, Dask)
- Backend vagy frontend fejlesztési tapasztalatod (pl. Java, Node.js, Angular)
- Informatikai vagy kapcsolódó műszaki felsőfokú végzettséged

### **Ezért érdemes hozzánk csatlakozni:**

- Stratégiai jelentőségű szerepkör, ahol valós ráhatásod lehet enterprise AI rendszerek kialakítására
- Modern technológiai környezet, nagy nyelvi modellekre, RAG és agentikus megoldásokra építve
- Érdemi befolyás a fejlesztési irányokra és a mérnöki standardok alakítására
- Folyamatos szakmai fejlődési lehetőség és aktív tudásmegosztási közeg
- Versenyképes juttatási csomag és rugalmas

[Jelentkezés](#) 

[Mentés](#)

## What You'll Bring

- 2+ years' experience in developing systematic strategies including a verifiable track record with positive PnL and Sharpe or equivalent research experience
- Strong programming skills in mainstream quant programming languages, such as Python and C++
- Quantitative background - includes degrees in Mathematics, Statistics, Econometrics, Financial Engineering, Operations Research, Computer Science and Physics.

## The Specialized Portfolio Manager Opportunity

- Transparent and formula-based compensation
- Opportunities to contribute to other research and strategy initiatives
- Access to WorldQuant's alpha pool, portfolio management tools and innovative technology platforms
- Access to a deep and broad menu of datasets supported by a dedicated data team
- Cross-asset execution led by a multi-regional trading team
- Participation in internal research conferences and forums
- Autonomy to build your own strategies along with several opportunities for collaboration and mentorship
- Access to AI and Machine Learning opportunities applied to financial markets

By submitting this application, you acknowledge and consent to terms of the [WorldQuant Privacy Policy](#). ### What You'll Bring

- Master's degree or higher in Computer Science, Engineering, or a related technical field from a top-tier institution.
- 7+ years of experience as a Python developer, with a strong focus on data engineering and AI/ML systems.
- Expert-level knowledge of Python and its ecosystem, including experience with data processing libraries like Pandas, NumPy, and PySpark.
- Proficiency in designing and implementing scalable, maintainable, and efficient data pipelines.
- Experience with cloud platforms (AWS, GCP, or Azure) and containerization technologies (Docker, Kubernetes).
- Expertise in version control systems (Git), CI/CD practices, and agile methodologies.
- Strong communication skills with the ability to explain complex technical concepts to both technical and non-technical stakeholders.
- Proven track record of mentoring junior engineers and fostering a collaborative team environment.
- Experience in the finance industry is a plus but not required.
- Experience with AI/ML frameworks such as PyTorch, or scikit-learn, LLM, agents or systems of agents is a significant plus.

### What We Offer

- Competitive compensation package
- Core benefits include: premium private health insurance and life insurance with savings plan
- Support for every aspect of life through Employee Assistance Program and fully covered sick leave
- Strong culture of learning and development: training courses, library, guest speakers, share and learn events, global conferences
- Regular offsite team buildings, annual conferences and occasional global summits – opportunity to travel and connect with our local and global teams

### **Téged keresünk, ha:**

- Felsőfokú végzettséggel rendelkezel (üzleti, marketing vagy IT területen)
- Legalább 3 év releváns adatelemzői tapasztalatod van
- Magabiztosan használod az Excelt és az SQL-t
- Képes vagy komplex adatokat üzleti szempontból értelmezni
- Proaktívan keresed a megoldásokat, és nem csak a problémákat látod
- Önállóan és projekt szemlélettel dolgozol
- Magabiztos angol nyelvtudással rendelkezel

### **Előnyt jelent:**

- Power BI tapasztalat
- Pénzügyi vagy biztosítási szektorban szerzett tapasztalat
- Felhőalapú adatplatformok és adatmenedzsment ismerete
- AI-alapú riportálási vagy elemzési megoldások használata
- Marketing- vagy digitális kampányadatok elemzésében szerzett gyakorlat

### **Mit kínálunk?**

**Jelentkezés** 

**Mentés**

### What You'll Bring

- Strong software engineering skills, preferably in Python, with an ability to build reliable, maintainable production systems.
- Experience taking features from an ambiguous request through technical design, delivery, rollout, and iteration.
- Product-minded approach: able to clarify user needs, make pragmatic scope and technical trade-offs, and focus on high-impact outcomes.
- Strong analytical skills and a passion for solving complex, real-world problems.
- Solid understanding of modern AI systems and practical experience with LLM-powered applications, including retrieval-augmented generation (RAG), agentic workflows, document search, and evaluation.
- Familiarity with relevant data and platform technologies, such as vector search/vector databases, SQL, and messaging systems.
- Ability to define and use appropriate measures of feature quality, usefulness, reliability, and adoption.
- Strong communication skills in English, including the ability to work directly with and support internal users.
- Mature, thoughtful attitude; comfortable working independently in a small team and taking responsibility for outcomes.
- Strong delivery mindset and a drive to get things done.
- Experience in finance is not required.

### What We Offer

- Competitive compensation package
- Core benefits include: premium private health insurance and life insurance with savings plan
- Support for every aspect of life through Employee Assistance Program and fully covered sick leave
- Strong culture of learning and development: training courses, library, guest speakers, share and learn events, global conferences

- Experience with cloud AI/data platforms such as **Azure ML, Databricks or AWS**
- Experience with **ETL, APIs and model deployment**
- Fluent English and a strong problem-solving mindset

Nice to have

- **LangChain, CrewAI** or other GenAI/multi-agent frameworks
- **SAP AI Core / SAP BTP**
- Scrum / SAFe experience

Location & Working Model

 **Sofia or Budapest – or nearby**

 **1 day per week in the office**

**Egyszerű  
jelentkezés**

**Mentés**

### Várjuk jelentkezésed, ha:

- Informatikai, mérnöki vagy kapcsolódó felsőfokú végzettséggel rendelkezel.
- Minimum 3-5 év releváns szakmai tapasztalatod van szoftverfejlesztés, AI/ML vagy adatplatform területen
- Van tapasztalatod AI, Machine Learning vagy Generative AI megoldások fejlesztésében
- Ismered a mesterséges intelligencia és a gépi tanulás alapjait
- Ismered a generatív AI (LLM-ek) működését és alkalmazási lehetőségeit
- Van tapasztalatod komplex vállalati rendszerek tervezésében és fejlesztésében
- Otthon vagy az API-alapú integrációk kialakításában
- Van jártasságod vagy nyitott vagy tanulni a felhő- és konténer technológiákban (pl. AWS, Docker, OpenShift)
- Dolgoztál már agilis fejlesztési környezetben
- Középszintű angol nyelvtudással rendelkezel
- Rendszerszinten gondolkodsz, jó a problémamegoldó készséged
- Precizitás és minőségorientáltság jellemző
- Jó együttműködő és kommunikációs képességgel rendelkezel
- Önállóan is tudsz dolgozni, felelősséget vállalsz a munkáért és jól gazdálkods az idővel
- Igényed van a folyamatos fejlődésre, gyorsan tanulsz és alkalmazkods

### Miért érdemes csatlakoznod hozzánk?

#### Biztonság és fejlődés

- Stabil nemzetközi háttérrel rendelkező multinacionális vállalatban belül valósíthatod meg önmagad,
- Egyéni célokhoz igazított karrierút, **előrelépési lehetőségek várnak**,
- **Elkötelezett, támogató vezetőkkel és szakmailag felkészült kollégákkal, mentorokkal** dolgozhatsz,
- **Területeken átívelő projekteken** vehetsz részt, változatos kihívásokban lehet részed.

#### Támogatás és juttatások

- **HOME OFFICE lehetőséget** kínálunk,
- **16 féle Cafeteria juttatási elem közül választhatsz:** SZÉP kártya, extra szabadnap,

Jelentkezés 

Mentés

### What You'll Bring

- Extensive experience in reporting, data analytics, business intelligence, risk reporting, management information, or regulatory reporting
- Proven ability to independently create, manage, and deliver high-quality reporting for senior audiences
- Advanced proficiency in SQL, Tableau, Excel, PowerPoint, or comparable analytics and visualization tools
- Strong experience analysing large datasets and presenting findings through clear visualizations and compelling business narratives
- An innovative mindset and practical interest in applying AI, automation, and emerging technologies to reporting challenges
- Excellent stakeholder-management skills, with the confidence to influence, challenge, and build alignment across global teams
- Experience providing work direction, oversight, or quality assurance across locations
- Strong analytical judgement and the ability to identify root causes, risks, trends, and appropriate solutions
- Excellent written and verbal English communication skills
- The organization and ownership needed to manage multiple deliverables in a deadline-driven environment
- Experience in complaints, banking, risk, compliance, consumer finance, or another regulated environment is an advantage
- Knowledge of retail banking or institutional products and U.S. banking regulations is beneficial

### Why join us?

- Take ownership of a strategically important reporting and analytics capability
- Build solutions that directly influence senior management and governance decisions
- Modernize reporting through AI, automation, and advanced data visualization
- Gain international exposure by partnering with teams across Budapest, Mumbai, and the U.S.
- Combine hands-on technical delivery with strategic stakeholder influence
- Shape how complaints data is used to improve customer outcomes, controls, and business

**What will make you successful?**

- Experience: 7+ years in IT/Software Engineering, including 5+ years in Solution Architecture or technical leadership, with a track record of delivering enterprise-grade AI, cloud, or automation solutions.
- Education: Bachelor's/Master's degree in Computer Science, AI, Data Science, or a related field (or equivalent practical experience).
- AI & Data Tech Stack:
  - Deep practical knowledge of GenAI & Agentic Architecture (RAG, vector databases, multi-agent orchestration, tool calling, LLM evaluation, and safety guardrails).
- Core data engineering proficiency (data modeling, pipelines, relational/NoSQL).
- Python programming skills; familiarity with cloud-native stacks (Azure preferred—Azure OpenAI, AI Search).
- Pluses: Computer Vision (OCR, object detection) and frontend basics (React/Angular).
- Architecture & Delivery: Strong foundation in backend systems, secure API/modular design, distributed integration patterns, Agile delivery, and DevOps/MLOps/LLMOps pipelines (CI/CD, versioning, monitoring).
- Documentation & Safety: Experience creating clear C4 diagrams, technical specs, and runbooks while enforcing responsible AI, privacy, and security-by-design.

**Mindset & Communication:**

- Fluent in English with exceptional technical and non-technical stakeholder management skills.
- Analytical, pragmatic problem-solver who turns ambiguity into concrete MVP roadmaps.
- An ownership mindset with the ability to mentor, guide, and constructively challenge development teams.

**Nice-to-Have Skills:**

- Cloud & Integration: Hands-on experience with Azure-native AI services, API management, enterprise integration platforms, and identity/secure access patterns.
- Advanced AI: Familiarity with Computer Vision, agent/orchestration frameworks, TOGA, LLM observability, and evaluation tools.
- Governance & Standards: Experience setting up reusable AI architecture blueprints/standards, data privacy protocols, responsible AI, and AI-specific threat modeling.
