

Skills/Qualifications

- At least a Bachelor's degree (Master's degree preferred) in an applied mathematics or economic discipline, such as Statistics, Engineering, Mathematical Finance, Finance, Economics, or a related field.
- 0-3 years of relevant professional experience is preferred.
- Strong communication skills in English, with the ability to collaborate and influence stakeholders across functions.
- Familiarity with essential quantitative techniques used in financial models is a plus.
- Knowledge and familiarity with Generative AI and experience with using LLM are a plus.
- Programming skill in statistical packages such as R or Python is a plus.
- CFA, FRM, or CEFA is a plus.

What You Can Expect From Morgan Stanley

Jelentkezés 

Mentés

Your Profile

Strong Backend BI Foundation (must-have)

- Intermediate/Advanced SQL (complex joins, aggregations, case logic, window functions, etc).
- Hands-on experience validating and working with analytical data in Databricks or other cloud-based platforms.
- Solid understanding of analytical data modeling and how Tableau consume data.

Python & Automation

- Practical experience using Python for data processing or automation.
- Familiarity with tools and frameworks such as PySpark, dbt, Dagster, or similar.
- Ability to design backend BI solutions with frontend performance and usability in mind.

Nice-to-Have Skills

- Experience with Delta Lake, Unity Catalog, or Databricks SQL.
- Experience with Tableau/Power BI dashboards.
- Familiarity with data governance, testing, or monitoring practices.
- Familiarity with version control (git init, git add, git commit, git push, git pull, git checkout).

Qualifications

- Deep subscription billing expertise: substantial experience with payments, renewals, refunds, disputes/chargebacks/TC40 in a recurring-revenue business (non-negotiable).
- Advanced SQL: complex joins, window functions, incremental logic, and performance-aware query writing.
- Data visualization: proficiency with Omni, Tableau, Power BI, or similar tools to build dashboards and communicate insights clearly.
- People leadership: experience setting priorities, distributing work, reviewing output, and being accountable for a team's results.
- Statistical & analytical rigor: forecasting, experiment design, and translating ambiguous business questions into structured analysis.
- Billing platforms / processors: familiarity with tools such as Stripe, Braintree, Nuvei, or similar.
- Strong communication: ability to explain complex findings to both technical and non-technical stakeholders.
- Cross-functional collaboration: track record of influencing decisions with data across multiple departments.

Nice to have

- Python and/or modern analytics tooling (dbt, Airflow, or similar).
- Experience building and maintaining ETL/ELT pipelines for billing or financial data.
- Risk analysis or fraud-adjacent experience in billing contexts.
- Advanced visualization techniques (cohorts, funnels, anomaly detection dashboards).

Location

Ruby Labs operates within the CET (Central European Time) zone. Applicants from any country are welcome to apply for the position as long as they are located within approximately ± 4 hours of CET. This ensures optimal collaboration and communication during working hours.

**AI Developer**

HumanField Executive and Specialist Search • B...

**Your responsibilities:**

- Design and develop robust, scalable, and maintainable Python solutions in a modern SaaS environment, contributing to an AI-powered integration platform connecting legacy banking systems with modern digital architectures.
- Build intelligent, context-aware applications using modern AI frameworks, LLMs, RAG architectures, and vector databases.
- Develop AI-powered chatbots and assistants using Python and LLM APIs, including OpenAI and other leading model providers.
- Work on prompt engineering, LLM optimization and fine-tuning to improve the quality and reliability of AI-powered features.
- Deploy, operate, and scale AI services using FastAPI, Docker, Kubernetes, cloud technologies, and modern CI/CD practices.

What we're looking for:

- Strong Python development experience and hands-on knowledge of FastAPI or other modern Python web frameworks.
- Familiarity with machine learning libraries and frameworks such as NumPy, pandas, scikit-learn, PyTorch, or TensorFlow.
- Experience with Docker, Kubernetes, cloud environments (AWS, GCP, or Azure), and modern CI/CD workflows.
- Practical experience with LLM/AI technologies such as LangChain, RAG, vector databases is a plus.

What our client offers:

- The opportunity to work on an innovative, AI-driven fintech product solving complex, real-world challenges in the financial sector.
- A highly professional environment where you can learn from experienced specialists with strong expertise in both technology and banking.
- Technically challenging projects with significant

**Egyszerű
jelentkezés****Mentés**

What your new challenge will look like

- Lead the architectural vision and strategic direction for AI and machine learning systems across a distributed team in India and Europe.
- Architect unified, scalable and secure AI systems that supports international data sovereignty and regional privacy regulations.
- Influence 4flows product direction through clear, compelling presentations to management and stakeholders.
- Evaluate and select tools, frameworks and platforms for AI development, deployment and LLMOps.
- Provide technical leadership and mentorship to AI and engineering teams.
- Drive knowledge sharing, contribute best practices and foster continuous learning across teams.
- Continuously explore emerging AI technologies and trends to drive innovation.

Why you belong at 4flow

To be successful in this position, we believe you should possess the following attributes:

- Around 8 years of experience in system design and architecture, including at least 4 years focused specifically on AI/ML architecture
- Proven expertise in building and scaling agentic AI frameworks (e.g., LangGraph, AutoGen, CrewAI)
- A deep understanding of machine learning, deep learning and LLMOps practices
- Experience with cloud platforms (AWS, Azure, GCP) and containerization (Docker, Kubernetes)
- Proficiency in Python and familiar with ML frameworks such as TensorFlow, PyTorch and Hugging Face
- Experience in mentoring cross-functional teams and leading technical projects from concept to production deployment
- Ability to distinguish between AI hype and high-impact business use cases
- Comfortable with the “fail fast” nature of AI research while maintaining a clear path to production

Why 4flow?

- A clearly defined vision and job security at a company with German roots.
- Exciting international work environment as well as rapid career development opportunities.
- Outstanding opportunities for your individual development (individual training budget and internal trainings).
- Permanent position, competitive base salary, an attractive bonus system, and a great benefits package.
- Flexibility and the opportunity to work remotely.
- Employee Assistance Program for mental health

Required Qualifications And Skills

- BSc or advanced degree in a quantitative field like Computer Science, Mathematics, Statistics, Physics, or Engineering.
- 5+ years of professional software engineering experience, preferably in a financial trading environment (e.g. hedge fund, prop trading firm, or investment bank).
- Proficiency in a high-performance language (Golang/ C++/ Java/ Rust) and experience with a data analysis language (e.g. Python).
- Demonstrable experience building pricing models or algorithmic trading strategies.
- Strong understanding of financial market concepts, market microstructure and common trading algorithms.
- Excellent quantitative and analytical skills.
- Fluent written and oral English skills.

Bonus If You Have

- Experience building high-fidelity backtesting or market simulation environments from the ground up.
- Deep knowledge of cryptocurrency market structure, DeFi protocols and on-chain data.
- Familiarity with data analysis libraries (e.g., Pandas, NumPy, SciPy) and machine learning concepts.
- Experience working with large-scale time-series data and databases (e.g., KDB+, InfluxDB, TimescaleDB).
- Experience in a performance-sensitive or low-latency environment.

You are looking for us, if you have

- Subject-related studies (with a focus in computer science, mathematics, business mathematics, operations research) and ideally several years of professional experience.
- Knowledge of various optimization methods in the field of discrete optimization, e.g. combinatorial optimization, linear programming, constraint programming.
- Several years of practical experience in dealing with various optimization methods, preferably in the field of personnel resource planning or column generation.
- Solid knowledge of the programming language Python, Linux environment and GitHub.
- Passionate about software quality and design.
- High level of commitment and initiative, high resilience and pronounced flexibility.
- Good communication skills and assertiveness as well as a strong customer and service orientation.
- Ability to work methodically and analytically in order to solve complex problems in depth.
- Ability and willingness to discuss ideas with the team and community.
- Very good written and spoken English skills.
- Interest in running complex optimization processes in a cloud environment.

What we are proud to provide you with

- Hybrid working with even only weekly 2 office days and flexible working hours based on core time.
- Financial benefits such as; an outstanding amount of cafeteria, referral reward and team or individual reward based on your accomplishments.
- Corporate health insurance package at one of the largest private healthcare providers with nationwide coverage.
- Carefully designed career paths, with the appropriate training courses and projects to accomplish your aims such as language courses, tech talks and trainings for your needs.
- Lufthansa Group flight ticket discounts.
- What's more, if you are interested in our additional benefits: check out our [benefits](#) page.

Our community is characterized by mutual respect and an attitude of helpfulness. This high professional quality level and the colorful personalities will help you spend your everyday life in a good mood, why you make the best of your skills and talents.

In addition to an inclusive and helpful atmosphere, trust is also an important value for us. You can rely on us with anything right from your first day, and we also trust you to the utmost extent.

Are you ready to fly with us? Apply now!

Az álláshirdetésben szereplő juttatások

Jelentkezés 

Mentés

Elvárások

- Több éves tapasztalat AI alkalmazások és vállalati szoftverek fejlesztésében
- Magas szintű Python ismeret vagy Java / Spring AI fejlesztői tapasztalat
- Gyakorlati tapasztalat éles LLM- és RAG-megoldások fejlesztésében (pl. LangChain, LangGraph, LangSmith vagy Spring AI)
- Magabiztos ismeretek az alábbi területeken:
 - LLM API-k
 - prompt engineering
 - embeddingek
 - szemantikus keresés
 - adatbetöltési folyamatok
 - modellintegráció
- Tapasztalat relációs és vektoradatbázisok használatában, különösen PostgreSQL és pgvector környezetben
- Gyakorlat agent-alapú rendszerek, tool calling, MCP és multi-agent architektúrák területén
- Ismeretek biztonság, adatvédelem, compliance, monitorozás és production üzemeltetés témakörében
- Kiváló analitikus, kommunikációs és stakeholder management készségek
- Angol nyelvtudás C1 szinten

Előnyt jelent

- Tapasztalat Azure, Azure OpenAI, OpenAI API vagy más cloud AI platformok használatában
- Gyakorlati ismeretek Docker, Kubernetes, GitLab és CI/CD környezetben
- DevOps és LLMOps tapasztalat, beleértve az observability, tracing és LLM-alkalmazások kiértékelését
- Monitoring eszközök ismerete (pl. LangSmith, OpenTelemetry, Prometheus vagy Grafana)
- Informatikai vagy szoftverfejlesztői felsőfokú végzettség
- Tapasztalat n8n workflow- és automatizációs platformmal
- Ismeretek Pinecone, Weaviate, Qdrant, Elasticsearch vagy OpenSearch technológiákban
- Webfejlesztési tapasztalat Java/Spring Boot, TypeScript, Angular, React vagy Vue technológiákkal

Amit a cég kínál

- Részvétel innovatív, AI-alapú vállalati megoldások fejlesztésében
- Modern technológiák és vezető LLM-ökoszisztéma használata
- Nemzetközi projektek és szoros együttműködés külföldi szakértőkkel
- Távoli munkavégzés és rugalmas, együttműködésre épülő munkakörnyezet
- Hosszú távú szakmai fejlődési lehetőség a generatív mesterséges intelligencia területén

Requirements

- Advanced experience (over 5 years) in developing end-to-end data analytics solutions with classic and cloud data technologies
- At least 1 year of relevant leadership experience
- Production experience in Data Analytics, Data Visualization, Data Security, Data Modelling, etc.
- Solid expertise in designing self-service analytical data solutions
- Hands-on experience with advanced and hybrid data modeling approaches
- Knowledge of data lineage, metadata management, and data traceability concepts
- Production experience with data-oriented programming languages such as SQL, Python, SparkSQL, PySpark, R, or Bash
- Experience designing, implementing, deploying, and monitoring scalable and fault-tolerant cloud data solutions
- Good experience with CI/CD principles and best practices at the project level
- Data-oriented mindset with strong compliance awareness, including PI, GDPR, HIPAA
- Motivated and independent with the ability to manage multiple projects and set priorities under pressure
- Analytical problem-solving skills with ability to work abstractly and gain consensus
- Excellent interpersonal, leadership, and communication skills
- Ability to work effectively in a fast-paced, agile development environment
- Experience in direct client communications
- Experience leading technology teams on data-oriented projects
- Solid skills in troubleshooting, monitoring, support, performance tuning, and bottleneck analysis of data solutions
- Experience across different business domains
- English proficiency at B2+ level

We offer

- Dynamic, entrepreneurial corporate environment
- Diverse multicultural, multi-functional, and multilingual work environment
- Opportunities for personal and career growth in a progressive industry
- Global scope, international projects

[Jelentkezés](#) 

[Mentés](#)

Qualifications

Background and required skills:

- 4+ years in software engineering with strong Python and scripting skills
- 2+ years deploying and operating production systems (CI/CD, monitoring, incident response)
- 2+ years working with cloud platforms (AWS preferred, but multi-cloud awareness valued)
- 1-2+ years with LLMs, agentic AI, RAG systems, or production AI/ML systems
- Proven track record: Shipped AI systems to production with full automation and monitoring

Soft Skills & Team Fit

- Ownership mentality: Take responsibility for features from design through production operations
- Pragmatic problem-solver: Balance perfection with delivery, make informed trade-offs
- Clear communicator: Explain technical concepts to both engineers and non-technical stakeholders
- Automation advocate: Default to "automate it" rather than "document the manual steps"
- Self-directed: Drive projects forward with minimal supervision
- Collaborative: Share knowledge, review code, support teammates
- Production-minded: Think about monitoring, security, scalability from the start
- Adaptable: Comfortable with ambiguity, changing requirements, and learning new technologies
- Quality-focused: Write clean code, comprehensive tests, and clear documentation

Advantage:

Advanced Agentic AI

- Experience with agent frameworks (LangGraph, CrewAI, AutoGen, Strands)
- Agent memory systems (short-term, long-term, semantic memory)
- Agent evaluation and benchmarking methodologies
- Human-in-the-loop patterns for agent systems
- Agent safety, guardrails, and responsible AI practices

Domain Knowledge

- Experience in telecommunications or enterprise IT
- Log analysis and operational intelligence systems
- Document processing and information extraction
- Customer-facing AI solution delivery

Additional Information

- Please be informed that our remote working possibility is only available within Hungary due to European taxation regulation.

Mentés

**You have:**

- Strong software development experience with a focus on Python, infrastructure, and data-intensive applications
- Experience translating business requirements into technical designs and implementations
- Strong analytical and problem-solving skills with hands-on experience working with structured data
- Experience working across cross-functional teams and bridging business and technology perspectives
- Excellent communication skills with the ability to explain complex technical concepts clearly
- Approximately 4–6+ years of relevant professional experience

You might also have:

- Familiarity with AI and agent-based systems, including protocols such as MCP
- Experience with platform or system-level development such as APIs, execution environments, or integration layers
- Understanding of modern engineering practices including automated testing, service-oriented architectures, and web-based integrations
- Exposure to cloud-based development environments
- Experience providing technical leadership to small teams
- Project management experience for mid-sized initiatives
- Knowledge of quantitative analytics, modelling, or financial concepts within capital markets or financial services environments

Team profile:

This team is focused on building and evolving analytics platforms that combine data, automation, AI, and modern engineering practices. Working closely with business and technology partners, the team develops scalable solutions that enable model execution, advanced analytics, and AI-powered workflows across the organization.

About us:[Egyszerű
jelentkezés](#)[Mentés](#)

Olyan Analytics Engineer kollégát keresünk, aki magabiztosan mozog az SQL, az adatmodellezés és a modern data stack világában, és szívesen épít megbízható, jól skálázható adatmodelleket és transzformációkat nagyvállalati környezetben.

What We're Looking For:

- Proven commercial track record (3–6+ years) in applied Data Science, Machine Learning, and Python software engineering.
- Strong ensemble background combining deep ML/DL fundamentals with practical depth in Graph AI and modern NLP/LLM engineering.
- Consultant mindset: proactive problem solver who thrives in fast-changing frontier environments, embraces ambiguity, and communicates complex AI logic clearly.
- Solid experience in system observability, model drift monitoring, data lineage, and reproducible **ML workflows**.

Must-Haves:

- 3–6+ years of production **Python software engineering experience**.
- Strong grounding in **Core ML, Deep Learning, and experiment design**.
- Hands-on experience building **RAG architectures, retrieval/search systems (lexical, vector, hybrid), and agentic workflows**.
- Exposure to knowledge **graph modeling, graph databases (e.g., Neo4j), and graph representation learning/GNNs**.
- Familiarity with cloud environments (**Azure, AWS, or GCP**) and **CI/CD practices**.
- Excellent English communication skills for daily cross-functional collaboration.

Location & Working Setup:

- 100% Remote working model (Candidates must be living and working within the EU)
- US Hours overlap needed: Minimum 2:00 PM – 6:00 PM CET (Preferred 2:00 PM – 7:00 PM CET).
- Availability for quarterly 1–3 day team workshops/ gatherings in Prague (all travel and accommodation expensed).

Ready to build the intelligence and architectures that define next-generation AI platforms? Apply today or send your CV directly to get started!

AI Solution Architect

Peak · Budapest, Hungary (Hybrid)

What You'll Do

Primary Responsibilities:

- **Bridge business and technology** – Act as translator between client requirements and development team specifications
- **Lead workshops & discovery sessions** – Facilitate client meetings to uncover use cases and business opportunities
- **Coordinate with development teams** – Ensure smooth communication flow, participate in sprint reviews, and validate technical deliverables
- **Design AI solutions** – Create RAG pipelines, define vector database architectures, and specify GenAI technology stacks
- **Manage projects** – Handle project planning, monitoring, and stakeholder reporting
- **Deliver training & education** – Conduct AI workshops for clients and internal teams
- **Define success metrics** – Develop KPI frameworks and quality assurance plans for AI implementations

Growth Opportunities:

- Develop comprehensive AI adoption strategies
- Design complex solution architectures
- Lead proposal development and client presentations
- Drive AI evangelization and cultural transformation initiatives

What you bring

- **Proven Track Record** – Minimum 3 years as a consultant, analyst or similar strategic role.
- **AI/GenAI proficiency** – Strong understanding of AI models, including LLMs, RAG frameworks, and agentic workflows.
- **Technical knowledge** – Experience with AI tools such as OpenAI, LangChain, and CrewAI.
- **Strategic mindset** – Ability to translate business goals into actionable AI strategies.
- **Strong communication skills** – Ability to present technical concepts to business stakeholders.
- **Problem-solving expertise** – Strong analytical skills with a focus on delivering business value.
- **Language skills** – Fluent English and Hungarian for client interactions
- **Adaptability** – Thriving in fast-paced, evolving environments with emerging technologies

What's in it for You?

- **Competitive Salary** – Your expertise is valued here.
- **Work Autonomy** – Shape your own work processes and innovate freely.
- **Professional Growth** – Access courses, conferences, and industry-leading tools to stay ahead.
- **Top-Notch Equipment** – We'll provide high-performance gear to help you excel.
- **Flexible Home Office** – Enjoy remote work options that suit your lifestyle.
- **Fun & Friendly Atmosphere** – Join a supportive, energetic culture that values camaraderie.
- **Corporate Health Package by Doktor24** – Benefit from annual preventive check-ups, specialist consultations, and more for your well-being.

- Ability to work independently, navigate ambiguity, and deliver practical solutions in a fast-paced environment.
- A builder mindset with a passion for creating high-quality, impactful products.

Why We Think You Will Love Working Here

With us you count as a person, our doors are always open.

We live the Qualysoft Team Spirit and stand for transparency!

Fresh wind and new ideas are welcome, because standstill is a foreign word at Qualysoft.

We may use artificial intelligence (AI) tools to support parts of the hiring process, such as reviewing applications, analyzing resumes, or assessing responses and identifying potential inconsistencies or verification signals in application materials based on available information. These tools assist our recruitment team but do not replace human judgment. Final hiring decisions are ultimately made by humans. If you would like more information about how your data is processed, please contact us.
