

Minimum Qualifications

- Bachelor's degree in computer science, Statistics or Mathematics or related field.
- 2-4 years experience in data analysis.
- Technical proficiency in SQL and Python
- Hands on experience building reports and dashboards with tools such as Power BI and Superset. Hands on experience with glue, redshift.
- Strong knowledge of how relational databases work and various schema types – such as STAR or Snowflake.
- Experience writing queries for MSSQL server, Postgres, Redshift and AWS Athena or Trino.
- Exposure to analysis using machine learning related projects is a plus. Ability to work independently and collaboratively in a team environment

Qualifications Considered a Plus

- Understanding of automated test environments for hardware validation or software QA
- Familiarity with DevOps tools for CI/CD and infrastructure-as-code

Budapest Perks & Benefits

You would be working from our office in Budapest, in Graphisoft Park, next to the riverbank of the Danube.

We also offer:

- Annual Budapest travel card or parking in the office garage

[Jelentkezés](#) 

[Mentés](#)

Key Skills

To be successful as a Quant Developer, the ideal candidate will bring the following skills:

- Educational qualifications in a discipline such as computer science, software or IT engineering, applied mathematics, quantitative finance, physics, or similar fields; Masters' or above highly preferred
- Experience (including Internships) working on software development projects, ideally as a Quantitative Developer or IT Quant at an investment bank, hedge fund, specialist consulting firm or financial institution; relevant personal projects are also of interest
- Excellent programming skills in Python, C++, C# or Java (Object Oriented and Functional)
- Writing clean code using SOLID principles
- Willingness to work in Agile software development environments
- Strong consultancy and client services mindset
- Proven track record of working with international stakeholders
- Good documentation and communication skills
- English proficiency is a must

Next Steps

This is an excellent opportunity to establish yourself within a rapidly expanding consultancy firm in a high growth Quantitative Centre of Excellence led by recognised industry leaders, built on a foundation rooted in academic rigour and a culture of R&D and software engineering best practices. The right professional can grow their skills and abilities while continuing to actively contribute in a hands-on technical manner on challenging global projects.

Graduates & Young Professionals are encouraged to apply but note that we may recommend an Internship/Graduate Program position if it is more appropriate.

Posted on 10th August 2026

Riasztás beállítása hasonló

[Jelentkezés](#)[Mentés](#)

Minimum Qualifications

- Education: A Master's or PhD in Computer Science, Mathematics, Physics, or a highly quantitative field (Financial Engineering, etc.).
- C/C++ Programming Expertise: Deep understanding of memory management, STL, and concurrent programming for performance-critical systems.
- Python: Proficiency in the scientific stack (NumPy, SciPy, Pandas) and integration with C++ via wrappers (Pybind11/Cython).
- Mathematical Proficiency: Strong foundation in stochastic calculus, linear algebra, and numerical methods (e.g., Monte Carlo simulations, Finite Difference Methods).
- Financial Domain Knowledge: Solid understanding of Fixed Income (yield curves, duration, convexity) and Derivatives pricing (Black-Scholes, Volatility surfaces, Credit models).

Preferred Qualifications

- Financial Systems: Hands-on experience working with professional trading platforms and financial data terminals (Bloomberg/Refinitiv).
- High-Performance Computing (HPC): Experience with GPU programming (CUDA or OpenCL) or distributed computing frameworks.
- Machine Learning: Knowledge of applying deep learning or reinforcement learning to financial time-series data.

Benefits

- Competitive Salary: A top-tier compensation package tailored to your experience and the global market.
- Ownership Stake: Employee Share Options (ESOP), allowing you to directly benefit from the company's long-term growth and success.
- Professional Growth: Access to International Conferences (US, Europe, and beyond) to stay at the forefront of your field.
- Career Development: Structured Career Building Plans with clear milestones and the support needed to transition into leadership or specialized roles.
- Premium Mobility: A Company Car provided as part of your compensation package (subject to role/seniority level).
- Daily Perks: Complimentary lunch, snacks, and premium coffee to keep you fueled throughout the day.
- International Environment: The opportunity to work in a truly global setting with sister companies in the US and EU.

Jelentkezés [↗](#)

Mentés

These are the essentials you'll need to get an interview:

- 5+ years of experience delivering secure, scalable applications in agile environments.
- Strong ability to write highly readable, maintainable, and well-tested code, with a solid grounding in software design principles.
- Strong hands-on skills in Python and Node.js/TypeScript on a major cloud platform (preferably AWS), including serverless or microservice patterns, infrastructure as code (CDK/Terraform), CI/CD, containerization, and observability tooling.
- Experience building and operating backend services or microservices in a major cloud environment, preferably AWS.
- Good understanding of the full lifecycle of AI-based solutions, from experimentation and implementation through deployment, monitoring, and iteration.
- Practical experience working with LLM-based systems or adjacent AI technologies.
- Ability to collaborate effectively across disciplines and help translate applied science work into robust product capabilities.
- Habit of integrating security best practices (IAM, secrets management, privacy controls) into everything you build — including AI components.
- Excellent communication and leadership skills: you explain complex technical and AI topics clearly to different audiences.

It would be great if you had these to, but we'll support you if you don't:

- Hands-on experience with AWS CDK.
- Hands-on experience with LLM-related techniques such as prompt engineering, fine-tuning, model evaluation, RAG, agentic solutions, or MCP servers.
- Experience developing AI evaluation, observability, or governance mechanisms for production systems.
- Experience shaping shared platform capabilities or reusable engineering patterns across multiple teams.
- Experience improving performance, reliability, or cost efficiency for cloud-based AI or data-intensive services.
- Interest or experience in mentoring peers, raising engineering standards, and helping teams adopt better ways of working.

About Us

Diligent is the AI leader in governance, risk and compliance (GRC) SaaS solutions, helping more than 1 million users and 700,000 board members to clarify risk and elevate governance. The Diligent One Platform gives practitioners, the C-Suite and the board a consolidated view of their entire GRC practice so they can more effectively manage risk, build greater resilience and make better decisions, faster.

At Diligent, we're building the future with people who think boldly and move fast. Whether you're designing systems that leverage large language models or part of a team reimagining workflows with

Requirements

- Experience in requirements engineering, solution architecture, systems development, deployment and maintenance
- Knowledge of architecture, design patterns and technological landscape in at least 3 technology domains (Data Platforms, IoT, ML, Backend, Mobile, etc.)
- Profound knowledge of the technology's internals for at least 1 technology domain
- Solid understanding of the core concepts in data and analytics platform architectures, data warehousing, business intelligence, data management, integration, security and operations areas
- Wide experience in design, implementation, deployment, troubleshooting and re-platforming of distributed systems both on premises and in the Cloud
- Structured and systematic knowledge of the entire architecture design process (requirements, quality attributes, technology selection, estimation, proposal verification, documentation, etc.)
- Experience in all phases of the software development life cycle using different development methodologies and best practices
- Highly organized and detail-oriented
- Good communication skills
- Fluent English

We offer

- Dynamic, entrepreneurial corporate environment
- Diverse multicultural, multi-functional, and multilingual work environment
- Opportunities for personal and career growth in a progressive industry
- Global scope, international projects
- Widespread training and development opportunities
- Access to LinkedIn Learning solutions
- Competitive salary and various benefits
- Advanced wellbeing and CSR programs, recreation area

**Data Quality Engineer QA**

Dynata • Hungary (Remote)

**Required Qualifications**

- 2-4 years in data engineering, data quality, or analytics engineering roles
- Hands-on experience with data quality tools: Great Expectations, dbt tests, Soda, Monte Carlo, or similar
- Strong SQL and Python skills for writing validation logic and quality metric queries
- Experience with Apache Spark or dbt for large-scale data transformation and testing
- Familiarity with data profiling techniques and statistical approaches to anomaly detection
- Knowledge of data observability concepts and their application in lakehouse environments
- Experience with Airflow or similar orchestration tools to schedule quality jobs
- Bachelor's degree in Computer Science, Statistics, Engineering, or related field

Preferred Qualifications

- Experience with Databricks or Snowflake data quality native features
- Knowledge of DataHub or data catalog integration for quality score publishing
- Familiarity with data contracts and shift-left quality approaches in data mesh architectures

What Dynata Can Offer You

In addition to a competitive salary, we offer a comprehensive range of benefits tailored to each country. Our benefits are designed to support your well-being and help you achieve a healthy work-life balance.

About Us

Dynata is the world's largest first-party data and insights platform. With a reach that encompasses 62 million consumers and business professionals globally, and an extensive library of individual profile attributes collected through surveys. Dynata is the

Jelentkezés 

Mentés

Szakmai elvárások:

- Legalább 3-5 év tapasztalat Data Engineer, BI Developer vagy hasonló területen
- Magas szintű Power BI ismeret – adatmodellezés, DAX fejlesztés, Power Query / M, riport- és dashboardfejlesztés, teljesítményoptimalizálás
- Erős SQL tudás és adatbázis-tervezési tapasztalat – MS SQL / PostgreSQL / Firebird
- Tapasztalat ETL/ELT folyamatok és skálázható data pipeline-ok fejlesztésében
- Python fejlesztési tapasztalat adatfeldolgozási feladatokra – Pandas / Numpy
- Python web framework ismeret API fejlesztéshez – Flask / FastAPI / Django
- Relációs és NoSQL adatbázisok magabiztos használata – MongoDB előny
- Magas szintű Excel és üzleti riporting ismeret
- Erős analitikus és problémamegoldó szemlélet
- Strukturált gondolkodás és üzleti fókusz

Előnyt jelent:

- Azure Data Platform és Azure CI/CD Pipeline tapasztalat
- Agilis módszertanok ismerete
- Enterprise riporting rendszerek fejlesztésében szerzett tapasztalat
- Egészségügyi informatikai háttér
- Tapasztalat nagy adatmennyiség kezelésében és optimalizálásában
- Jó kommunikációs készség és csapatmunkára való nyitottság

Amire számíthatsz, ha ezt a lehetőséget választod:

- Rugalmas munkarend és Homeoffice lehetőség akár heti 4 napban
- Éves bónusz
- Cafetéria változtatható elemekkel (Szép-kártya)
- Szakmai tréningek, céges workshop-ok, egyénre szabott képzési terv
- Stabil, nemzetközi háttérű vállalat, itthon 100+ fős szervezet
- Önálló, felelősségteljes munka hosszú távra
- A vállalatban belül remekül kooperáló szervezeti egységek
- Kellemes munkahelyi légkör, támogató vezetők

Job Requirements:

- Experience in data engineering, analytics engineering, or related technical roles.
- Strong SQL and Python skills, with experience building batch and/or streaming pipelines.
- Hands-on experience with data platforms, ETL/ELT tools, cloud environments, and data warehouses.
- Understanding of data quality, data governance, security, and access control principles.
- Ability to work cross-functionally and translate business needs into technical solutions.
- Experience supporting AI, machine learning, or automation initiatives
- 5+ years designing and building end-to-to architectures
- Bachelor's degree in computer science, software engineering, or a related field.
- Experience with data modeling and database design.
- Strong financial acumen (ARR, margin, leverage, performance metrics)
- Demonstrated ability to align strong functional leaders without formal authority
- Experience embedding AI, automation, or workflow redesign into operating environments
- Executive presence and EMT credibility

Salary Range:

The anticipated base salary range for this position is between **20,000,000 HUF and 26,000,000 HUF annually**. Base salary ranges may vary by geographic location and relevant experience, education, certifications, and seniority compared to others performing substantially similar work. There is no guarantee that an offer will be at the top of the posted range, as compensation decisions are based on a variety of factors including, but not limited to, skills, qualifications, and internal equity.

Here are some of our local benefits:

- Medical benefits after 90 days
- SZÉP Card allowance for recreational activities

Qualifications

Requirements

- 3–5 years in solution engineering, backend development, or technical implementation roles
- Experience working in enterprise IT environments
- Experience collaborating across business and IT domains
- Experience integrating AI/LLM APIs
- Strong understanding of API-based architectures
- Programming skills (e.g., Python or similar)
- Cloud experience (preferably Azure)
- Experience with AI application or orchestration platforms (e.g., Dify or comparable) is a plus
- Structured and solution-oriented mindset
- Strong ownership and execution focus
- Ability to quickly understand business processes
- Clear communication with technical and business stakeholders
- Ability to coordinate internal and external implementation partners

Benefits

[Mentés](#)

What we're looking for

We're looking for someone with real, hands-on experience who can pick up a project and run with it.

✅ 1-3 years of professional software development experience, building and shipping real products.

🎓 A computer science / engineering degree, or an equivalent path (rigorous coding bootcamp, self-taught with a strong portfolio). What matters most is that you can show your work.

🔧 End-to-end project experience. You've owned something from spec to production and can walk us through the decisions you made along the way.

⚡ Time at a dev shop, agency, or startup, where you got used to moving fast, wearing multiple hats, and working directly with client or stakeholder pressure.

🧠 Genuine, current fluency with AI tools. You're already using the latest models and tools in your own work.

🗣️ Strong client-facing English. You'll be in the room with clients, so you're comfortable translating between technical and business language.

🇭🇺 Native level Hungarian speaker. You will be working on Hungarian client projects as well.

🔥 High agency. You spot a problem, take it, and push it through.

Dein Profil

Wir suchen einen **erfahrenen AI Developer** mit umfassender Expertise in der Entwicklung komplexer KI-Anwendungen, Chatbots und LLM-basierter Systeme. Der ideale Kandidat sollte ausgeprägte Programmierkenntnisse in Python oder Java, praktische Erfahrung mit RAG-Lösungen und Kompetenz im Umgang mit Cloud- und On-Premise-Umgebungen mitbringen. Ausgezeichnete Englischkenntnisse und die Fähigkeit, mit internationalen Teams zu arbeiten, sind unerlässlich.

Muss-Kriterien

- Mehrjährige Erfahrung in der Entwicklung von KI-Anwendungen und Unternehmenssoftware
- Sehr gute Python-Kenntnisse oder Java/Spring AI Entwicklungserfahrung
- Praktische Erfahrung in der Entwicklung von LLM- und RAG-Lösungen (z.B. LangChain, LangGraph, LangSmith oder Spring AI)
- Sichere Kenntnisse von LLM APIs
- Sichere Kenntnisse im Prompt Engineering
- Sichere Kenntnisse von Embeddings
- Sichere Kenntnisse der semantischen Suche
- Sichere Kenntnisse von Datenladeprozessen
- Sichere Kenntnisse der Modellintegration
- Erfahrung im Umgang mit relationalen und Vektordatenbanken, insbesondere in PostgreSQL- und pgvector-Umgebungen
- Praxis in agentenbasierten Systemen
- Praxis im Tool Calling
- Praxis im MCP (Model Context Protocol)
- Praxis in Multi-Agenten-Architekturen
- Kenntnisse in Sicherheit, Datenschutz und Compliance
- Kenntnisse in Monitoring und Produktionsbetrieb
- Ausgezeichnete analytische Fähigkeiten
- Ausgezeichnete Kommunikationsfähigkeiten
- Ausgezeichnete Stakeholder-Management-Fähigkeiten
- Englischkenntnisse auf C1-Niveau

Von Vorteil

- Erfahrung mit Azure, Azure OpenAI, OpenAI API oder anderen Cloud-KI-Plattformen
- Praktische Kenntnisse in Docker, Kubernetes, GitLab und CI/CD-Umgebungen
- DevOps- und LLMops-Erfahrung einschließlich Observability, Tracing und Evaluierung von LLM-Anwendungen
- Kenntnisse von Monitoring-Tools (z.B. LangSmith, OpenTelemetry, Prometheus oder Grafana)
- Fortgeschrittener Abschluss in Informationstechnologie oder Software Engineering
- Erfahrung mit der n8n Workflow- und Automatisierungsplattform
- Kenntnisse in Pinecone, Weaviate, Qdrant, Elasticsearch oder OpenSearch Technologien
- Webentwicklungserfahrung mit Java/Spring Boot
- Webentwicklungserfahrung mit TypeScript
- Webentwicklungserfahrung mit Angular, React oder Vue Technologien

Über uns

Deutsche Telekom IT Solutions, eine Tochtergesellschaft der Deutschen Telekom Gruppe, ist der attraktivste Arbeitgeber in Ungarn im Jahr 2025 (laut einer repräsentativen Umfrage von Randstad). Mit mehr als 5.300 Mitarbeitern bietet das Unternehmen ein breites Spektrum an IT- und Telekommunikationsdienstleistungen. Es betreut Hunderte von großen Firmenkunden in Deutschland und anderen europäischen Ländern.

DT-ITS wurde 2019 mit dem HIPA-Award „Beste Bildungs Kooperation“ sowie im selben Jahr als „Ethischstes multinationales Unternehmen“ ausgezeichnet.

[Mentés](#)

What makes you a great fit:

- 5+ years of professional data engineering experience
- 2+ years working with programmatic advertising and ad-tech data (GAM)
- Strong proficiency in Python and SQL
- Hands-on experience with data warehouses (BigQuery, Snowflake, Redshift, ClickHouse)
- Experience with batch processing frameworks (Spark, dbt, Airflow)
- Understanding of ad-tech data structures: bid requests, impressions, OpenRTB schemas, log-level data
- Experience with cloud platforms (AWS, GCP) and infrastructure-as-code
- Ability to work partial US work hours (available until 2pm ET)

Ad-Tech Data Experience

Data Sources (Familiarity Required):

- SSP reporting APIs and log-level data (Magnite, PubMatic, Index Exchange, Xandr)
- Google Ad Manager (GAM) reporting, Data Transfer files, and BigQuery exports

Data Models & Metrics:

- Revenue metrics: CPM, eCPM, RPM, fill rate, win rate, bid density
- Auction analytics: bid landscape, floor optimization, timeout analysis
- Demand partner performance: SSP/bidder scoring, latency analysis, viewability metrics, reach/frequency, IVT
- Supply chain data: ads.txt validation, sellers.json mapping, SPO analysis

Technical Stack:

- Languages: Python, SQL, Scala (nice to have)
- Processing: Apache Spark, dbt, Apache Flink
- Warehouses: BigQuery, Snowflake, ClickHouse, Redshift
- Orchestration: Airflow, Dagster, Prefect
- Storage: S3, GCS, Delta Lake, Parquet
- Infrastructure: AWS, GCP, Terraform, Kubernetes

Nice to Have

- Experience with ML feature engineering for bid optimization or yield prediction
- Background in building data products for publisher-side monetization
- Familiarity with privacy-preserving data techniques (differential privacy, clean rooms)
- Experience with CTV/OTT advertising data and video ad metrics
- Knowledge of identity resolution and cross-device data challenges

Your day-to-day in this position:

- Design and build and enhance scalable data pipelines for processing data from a variety of ad server and ancillary data sources
- Ingest and normalize data from multiple SSPs, DSPs, ad servers (GAM), and third-party reporting APIs
- Develop ETL/ELT workflows to transform raw data into analytics-ready datasets
- Create data models for campaign performance optimization, supply analysis, supply allocations, and profit maximization
- Build and maintain data warehouses and lakes optimized for ad-tech query patterns
- Implement data quality monitoring, validation, and anomaly detection for data streams
- Support Executive, BI and analytics teams with clean, documented, and performant data infrastructure
- Ensure data privacy compliance (GDPR, CCPA) in data collection, storage, and processing

Why work with us?:

- People-first management with minimal bureaucracy
- A friendly company culture, proven by employees who choose to return
- Flexible working hours
- 29 days of PTO (18 working days per year plus all national holidays)
- 10 paid recovery days
- Full financial and legal support for independent contractors
- Free English classes, with native speakers or Ukrainian teachers
- Dedicated HR support

Our next steps:

- ✔ Intro call with a Recruiter – ✔ Introductory interview with the Client – ✔ Home assignment – ✔ Final client interview – ✔ Offer

About You

- 3–5 years of experience in data quality, data governance, HR data management, or a related analytical role
- Demonstrated experience working with Workday HCM or comparable enterprise HR platforms (Workday certification or formal training highly valued)
- Proven track record of conducting data investigations and delivering structured, actionable findings
- Experience working in a global, matrixed organization with cross-functional stakeholders
- Proficiency in data analysis tools such as Excel/Power Query, SQL, or equivalent
- Experience with Workday reporting, calculated fields, and data auditing capabilities
- Familiarity with data remediation processes, including mass data loads and EIB (Enterprise Interface Builder) or equivalent
- Understanding of HR data domains: employee records, organizational structures, compensation, payroll inputs, and workforce reporting
- Exposure to AI/ML data readiness concepts and understanding of how data quality impacts model performance
- Experience with data quality platforms or monitoring tools (e.g., Informatica, Collibra, Ataccama, or similar)
- Experience with scripting or automation (e.g., Python, Power Automate, or equivalent) for data validation purposes
- Knowledge of GDPR, data privacy regulations, and their implications for HR data management
- Strong analytical and problem-solving skills, with the ability to decompose complex data issues and identify root causes with precision
- Strong communication skills, with the ability to translate complex data findings into clear narratives for both technical teams and senior leadership
- Strong interpersonal skills, with the ability to build effective working relationships across HR, Finance, Payroll, and IT
- Degree in Information Systems, Data Management, Human Resources, Business Administration, or a related field

Why choose us?

- Bring the miracles of science to life alongside a supportive, future-focused team.
- Discover endless opportunities to grow your talent and drive your career, whether it's through a promotion or lateral move, at home or internationally.
- Enjoy a thoughtful, well-crafted rewards package that recognizes your contribution and amplifies your impact.
- Take good care of yourself and your family, with a

Attractive pay

Jelentkezés 

Mentés

Your must haves

You don't need to meet every single requirement. If you're excellent in most of these areas and can show shipped work, we'd love to hear from you.

- Shipped generative pipelines adopted and used daily by other people;
- Production-grade workflows in ComfyUI or similar technologies, or equivalent code-first experience (e.g. diffusers);
- Strong Python: automation, API integrations, custom nodes;
- LoRA training end-to-end, from dataset curation to evaluation;
- Control techniques across modalities (t2i, i2i, i2v, v2v): ControlNet, IP-Adapter, inpainting, reference conditioning;
- Deploying pipelines as internal tools;
- Enough visual literacy to set the quality bar (no design portfolio required);
- Confident English (B2+).

Nice to have

- 3D/render-hybrid workflows: Blender or CAD renders as geometric ground truth with generated environments;
- LLM orchestration and agentic workflows: automated prompt generation, VLM-based QC;
- Experience producing visuals for performance marketing.

What We Offer

- Remote Work - we offer a truly and fully remote environment. You choose where you are the most productive and comfortable to have an impact.
- Paid vacations - generous paid vacation policy to ensure you have time to recharge
- Unlimited Sick Days - we understand that being only human means getting sick or feeling under the weather from time to time, so we guarantee you time off as long as you need to recover and get back on your feet

What You Bring

- 5+ years in data engineering or analytics engineering with a data warehouse at the center of your work
- Expert SQL: window functions, CTE-heavy transformations, query plan analysis, and performance tuning on an MPP warehouse (Redshift, Snowflake, or BigQuery)
- Strong dimensional modeling fundamentals and demonstrable data intuition
- Experience with dbt or a comparable transformation framework
- Experience maintaining or migrating a legacy warehouse in production
- Working Python for pipeline tooling and automation
- Excellent communication skills with both technical and non-technical stakeholders
- Solid communication skills in English

Bonus Points

- A dbt migration you've driven — from stored procedures, hand-rolled ETL, or another framework
- Data governance, metadata management, lineage, and data quality frameworks
- Exposure to the lake side: S3, Glue Data Catalog, Iceberg, Spark
- Experience designing analytical layers or building a warehouse architecture from scratch

What We Offer

- Flexible working hours with home office opportunity
- Medcover health insurance
- Company lunch every day in the office
- In-house gym in the office
- Exciting programs and team-building events

[Jelentkezés](#) 

[Mentés](#)

What You'll Bring

- Experience in portfolio analysis, credit, transaction services, valuation, risk, or financial modelling, corporate finance, asset or investment management
- Knowledge of investment products, lending, structured credit, FX, derivatives, or capital markets
- Strong quantitative and analytical skills, with confidence working with complex datasets
- Advanced Excel skills; experience with SQL, Python, VBA, Power BI, or other analytical tools is an advantage
- Ability to turn detailed financial analysis into concise management-level insights
- Strong communication skills and confidence working with international stakeholders
- A proactive, curious, and collaborative mindset with excellent attention to detail
- Bachelor's or Master's degree in Finance, Economics, Accounting, Financial Mathematics, Engineering, or another relevant discipline

Why join us?

- Build specialist expertise in asset-backed finance, structured credit, and portfolio management
- Gain exposure to multiple asset classes, financial products, and international markets
- Work closely with global colleagues and senior stakeholders in London and New York
- Strengthen your capabilities in financial modelling, investment analysis, risk assessment, and portfolio analytics
- Grow your career in a collaborative environment that values ownership, learning, innovation, and fresh ideas

[Jelentkezés](#) 

[Mentés](#)

Your Experience And Qualifications

- Advanced degree (MSc/PhD) in Statistics, Biostatistics, or related field
- Significant experience as a Lead/Principal Biostatistician in CRO, biotech, or pharma
- Strong knowledge of statistical methods for clinical trials and regulatory requirements (FDA/EMA)
- Proficiency in SAS (including advanced procedures)
- Solid experience with CDISC standards (SDTM, ADaM, TFLs)
- Ability to communicate complex statistical concepts to diverse stakeholders
- Strong organizational skills, attention to detail, and collaborative mindset
- Fluent in English

What You Can Expect From Us

- Work on complex, high-impact global studies
- Strong career development and growth opportunities
- Competitive compensation and comprehensive

Mentés

What We're Looking For:

- Proven commercial experience in **Data Engineering, large-scale data transformation, and production pipeline deployment.**
- Strong **Data Science and ML lifecycle awareness** with the ability to bridge data engineering workflows with model experimentation and production deployment.
- Consultant mindset: proactive problem-solving, architectural ownership, and clear communication with cross-functional technical teams.
- Experience with **pipeline observability, schema design, data quality validation, and lineage tracking.**

Must-Haves:

- Strong programming and data processing skills in **Python and PySpark.**
- Hands-on expertise with **Databricks** for distributed data engineering and scalable workflow orchestration.
- Practical experience with the **Azure ecosystem (Azure Blob Storage, Azure SQL/Databases, compute resources, MLflow, Azure AI/ML services).**
- Solid track record supporting **NLP/NLU workflows** and preparing structured datasets for machine learning applications.
- Strong English communication skills for daily international collaboration.

Location & Working Setup:

- 100% Remote working model (Candidates must be living and working within the EU).
- US Hours overlap needed: Standard work hours by 6:00 PM CET (Typically 10:00 AM – 6:00 PM or 11:00 AM – 7:00/8:00 PM CET).
- Availability for occasional in-person team workshops/gatherings (approx. 1x per quarter in Prague).

Ready to build the data foundation for next-generation AI platforms? Apply today or send your CV directly to discuss the details!

Data Engineer, Hungary

Ki ☐ Egyszerű jelentkezés

Mentés

Qualifications & Experience

- 5 years of experience in analytics, consulting, finance, operations, or business performance roles.
- Strong analytical and problem-solving skills with the ability to structure and interpret data.
- Good financial acumen and understanding of business performance drivers and P&L concepts.
- Advanced Excel and PowerPoint skills; experience with Power BI or other analytics tools is a strong advantage.
- Excellent communication and storytelling skills, with the ability to simplify complex information.
- Exposure to Lean, continuous improvement, or operational excellence methodologies is a plus.
- Experience in Service Operations, Field Services, or industrial environments is advantageous but not required.
- Master's degree in Business, Finance, Engineering, Operations, Data Analytics, or a related field preferred.

What Makes You Successful

- Curious and data-driven with a passion for solving business problems.
- Strong learner who thrives in a fast-paced, international environment.
- Comfortable working with senior stakeholders and cross-functional teams.
- Demonstrates Humility, Agility, and Mastery in everything you do.
- Willingness to travel internationally and experience different markets and cultures. (40-50% in Europe)

Why Join Us?

This role offers a unique opportunity to gain exposure to senior leadership, work on global transformation programs, develop consulting-style problem-solving skills, and make a visible impact on operational and financial performance from day one.

Bring your analytical expertise to a team that values your impact – apply today!

At Schneider, we believe that every employee is a talent who deserves equal opportunities. This

Dein Profil

Wir suchen einen vielseitigen **AI Engineer**, der solide Software-Engineering-Grundlagen mit AI/ML-Expertise kombiniert, um produktionsreife, agentische KI-Lösungen zu entwickeln, die automatisiert, skalierbar und anbieterunabhängig sind, mit End-to-End-Verantwortung vom Design über die Bereitstellung bis zum Betrieb.

Muss-Kriterien

- Mindestens 4 Jahre Erfahrung im Software-Engineering mit ausgeprägten Python-Kenntnissen
- Mindestens 4 Jahre Erfahrung im Software-Engineering mit ausgeprägten Scripting-Kenntnissen
- Mindestens 2 Jahre Erfahrung im Deployment und Betrieb von Produktionssystemen
- Erfahrung mit CI/CD-Pipelines
- Erfahrung mit Monitoring-Systemen
- Erfahrung mit Incident Response
- Mindestens 2 Jahre Erfahrung mit Cloud-Plattformen (AWS bevorzugt, aber Multi-Cloud-Bewusstsein geschätzt)
- 1-2+ Jahre Erfahrung mit LLMs (Large Language Models)
- 1-2+ Jahre Erfahrung mit agentischer KI
- 1-2+ Jahre Erfahrung mit RAG (Retrieval-Augmented Generation) Systemen
- 1-2+ Jahre Erfahrung mit produktiven AI/ML-Systemen
- Nachgewiesene Erfolgsbilanz beim Ausliefern von KI-Systemen in die Produktion mit vollständiger Automatisierung und Monitoring
- Fähigkeit, sauberen, wartbaren Python-Code und Automatisierungsskripte (bash/shell) zu schreiben
- Erfahrung im Aufbau von CI/CD-Pipelines und Deployment-Automatisierung für KI-Systeme
- Erfahrung in der Erstellung von Infrastructure as Code und Configuration Management Lösungen (terraform)
- Erfahrung in der Entwicklung von APIs, Microservices und ereignisgesteuerten Architekturen
- Fähigkeit, agentische KI-Systeme mit autonomem Reasoning und Tool-Nutzung zu entwerfen und zu implementieren
- Erfahrung im Aufbau von RAG (Retrieval-Augmented Generation) Systemen und Wissensbasen
- Erfahrung in der Entwicklung von Multi-Agenten-Orchestrierung und Koordinationsmustern
- Erfahrung in der Integration von LLMs mit Geschäftslogik und externen Systemen
- Fähigkeit, den kompletten Produktions-Deployment-Lebenszyklus zu verantworten
- Erfahrung in der Implementierung von Monitoring-, Logging-, Alerting- und Observability-Lösungen
- Fähigkeit, Runbooks, Deployment-Guides und operative Dokumentation zu erstellen
- Erfahrung in der Sicherstellung von Sicherheit, Skalierbarkeit und Zuverlässigkeit von KI-Systemen
- Fähigkeit, anbieterunabhängige, portable KI-Architekturen zu entwerfen
- Fähigkeit, pragmatische Build-vs-Buy-Entscheidungen für Komponenten zu treffen
- Fähigkeit, Managed Services mit Open-Source-Alternativen abzuwägen
- Fähigkeit, für Multi-Cloud-Kompatibilität zu konzipieren, wo angemessen
- Ownership-Mentalität mit der Fähigkeit, Verantwortung für Features vom Design bis zum Produktionsbetrieb zu übernehmen
- Pragmatische Problemlösungsfähigkeiten mit der Fähigkeit, Perfektion mit Lieferung auszubalancieren und fundierte Trade-offs zu treffen
- Klare Kommunikationsfähigkeiten mit der Fähigkeit, technische Konzepte sowohl Ingenieuren als auch nicht-technischen Stakeholdern zu erklären
- Automatisierungsbefürworter-Mentalität mit dem Standardansatz, zu automatisieren statt manuelle Schritte zu dokumentieren
- Selbstständig mit der Fähigkeit, Projekte mit minimaler Aufsicht voranzutreiben
- Kollaborativer Ansatz mit der Fähigkeit, Wissen zu teilen, Code zu reviewen und Teammitglieder zu unterstützen
- Produktionsorientiertes Denken über Monitoring, Sicherheit und Skalierbarkeit von Anfang an
- Anpassungsfähig und komfortabel mit Mehrdeutigkeit, sich ändernden Anforderungen und dem Erlernen neuer Technologien
- Qualitätsfokussiert mit der Fähigkeit, sauberen Code, umfassende Tests und klare Dokumentation zu schreiben

Von Vorteil

- Erfahrung mit Agent-Frameworks (LangGraph, CrewAI, AutoGen, Strands)
- Erfahrung mit Agent-Memory-Systemen (Kurzzeit-, Langzeit-, semantisches Gedächtnis)
- Kenntnisse über Agent-Evaluierungs- und Benchmarking-Methoden
- Erfahrung mit Human-in-the-Loop-Mustern für Agentensysteme
- Kenntnisse über Agent-Sicherheit, Guardrails und verantwortungsvolle KI-Praktiken
- Erfahrung in der Telekommunikation oder Unternehmens-IT
- Erfahrung mit Log-Analyse und Operational Intelligence Systemen
- Erfahrung mit Dokumentenverarbeitung und Informationsextraktion
- Erfahrung mit kundenorientierten KI-Lösungen

Qualifications

- ▶ At least bachelor's degree in STEM major,
- ▶ > 5 years of experience in a SW developer, or data engineer role (later preferred),
- ▶ Senior level in Python, Databricks and PySpark; hands-on experience with all of these,
- ▶ Knowledge of Hadoop,
- ▶ Experience with Cloud technologies, especially Azure.

What gives you further advantages:

- ▶ MSc in IT from a high-prestige university,
- ▶ Knowledge of BI tools (PowerBI or Spotfire),
- ▶ Experience in multinational, highly complex projects, ideally in a senior data engineer or architect role,
- ▶ AI/ML knowledge and experience of working in close collaboration with data scientists.

Additional Information

Get to know our benefits.

We would like to help you **GROW**, so we offer you:

- Financial security & recognition: We review and increase your competitive base salary annually, offer performance-, loyalty-, and referral bonus.
- Trainings and professional development: We

Mentés

Required Qualifications

- Bachelor's or Master's degree in a health, science, IT, mathematics, or related field.
- Minimum 6 years of industry experience in clinical data analysis, statistical programming, or pharmacometrics support.
- Expert-level proficiency in R for data processing, dataset creation, and QC automation.
- Hands-on experience creating NONMEM datasets, including complex data structures for PK/PD analyses.
- Strong understanding of SDTM, ADaM, and controlled terminology.
- Applied knowledge of PK/PD principles and clinical trial concepts.
- High attention to detail with strong analytical, documentation, and communication skills.
- Ability to work independently and collaboratively across global, cross-functional teams.

Preferred Skills

- Experience building or enhancing standardized workflows for NONMEM dataset creation, submission packages, and QC.
- Experience with R package testing, validation frameworks, or reproducible programming practices.
- Familiarity with pharmacometrics workflows in clinical or real-world settings.

IQVIA is a leading global provider of clinical research services, commercial insights and healthcare intelligence to the life sciences and healthcare industries. We create intelligent connections to accelerate the development and commercialization of innovative medical
